Borowiec_2015 · Taxon plot

92 of 33,672 sequences masked (0.3%)

each point represents a single sequence (a single locus in a single taxon), diagonal line is where the observed is the same as the expected divergence, dashed lines are the thresholds used for defining outliers (2x above, 1/3 below)

observed divergence of the cell, median over its comparators (%)

expected divergence of the cell, median over its comparators (%)

Borowiec_2015 · Number of sequences masked per locus and per taxon

92 of 33,672 sequences masked (0.3%)

Borowiec_2015 · Best match of each masked sequence

92 of 33,672 sequences masked (0.3%)

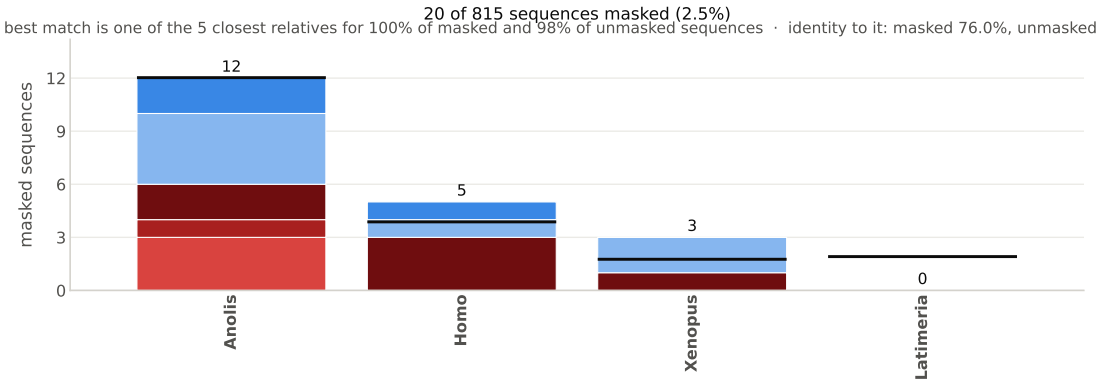

the 10 most masked taxa; each masked sequence is matched against every other taxon at its locus (identity over the masked sequence's sites, a site the other taxon lacks counting as a mismatch; ties to the closest relative genome-wide); bars count masked sequences by the taxon they match best; the tick is the count expected if they matched like the taxon's unmasked sequences; bold: the 5 closest relatives genome-wide

count expected if the masked sequences matched like the unmasked ones

Gallus

20 of 815 sequences masked (2.5%)

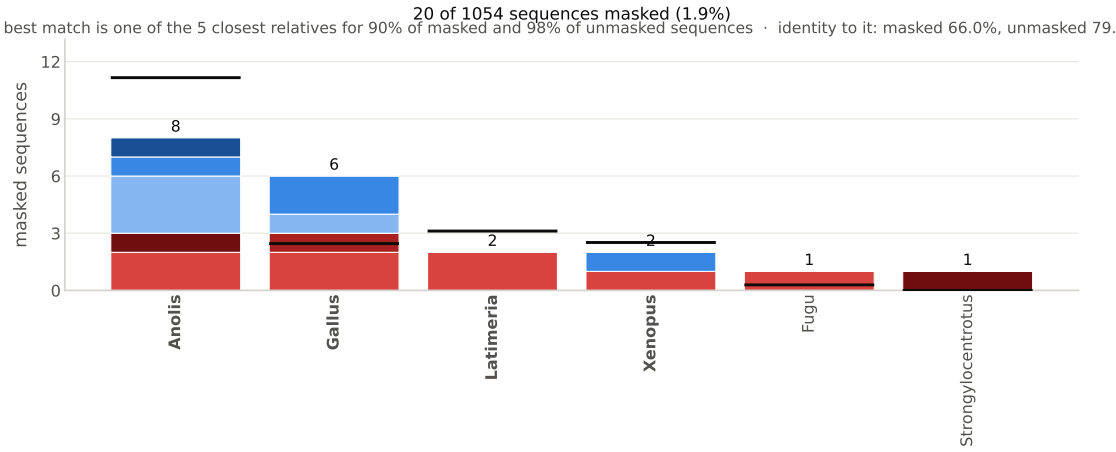

best match is one of the 5 closest relatives for 100% of masked and 98% of unmasked sequences · identity to it: masked 76.0%, unmasked 80.4%

Homo

20 of 1054 sequences masked (1.9%)

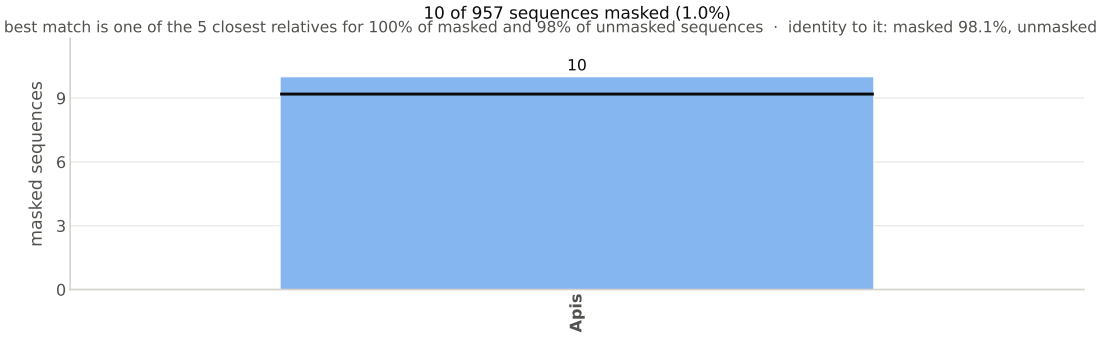

best match is one of the 5 closest relatives for 90% of masked and 98% of unmasked sequences · identity to it: masked 66.0%, unmasked 79.9%

Bombus

10 of 957 sequences masked (1.0%)

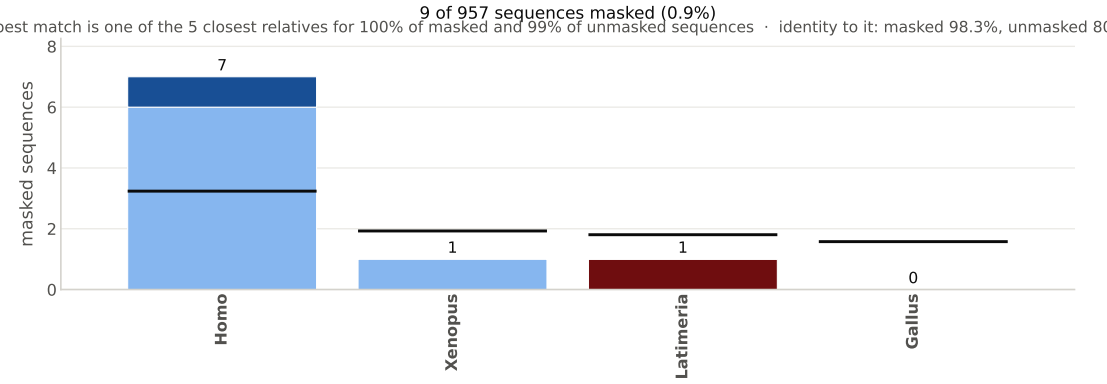

best match is one of the 5 closest relatives for 100% of masked and 98% of unmasked sequences · identity to it: masked 98.1%, unmasked 87.9%

Anolis

9 of 957 sequences masked (0.9%)

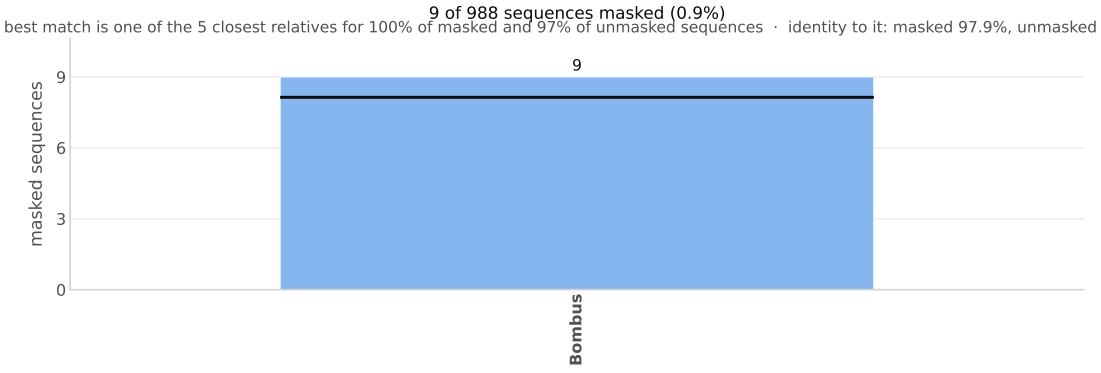

best match is one of the 5 closest relatives for 100% of masked and 99% of unmasked sequences · identity to it: masked 98.3%, unmasked 80.9%

Apis

9 of 988 sequences masked (0.9%)

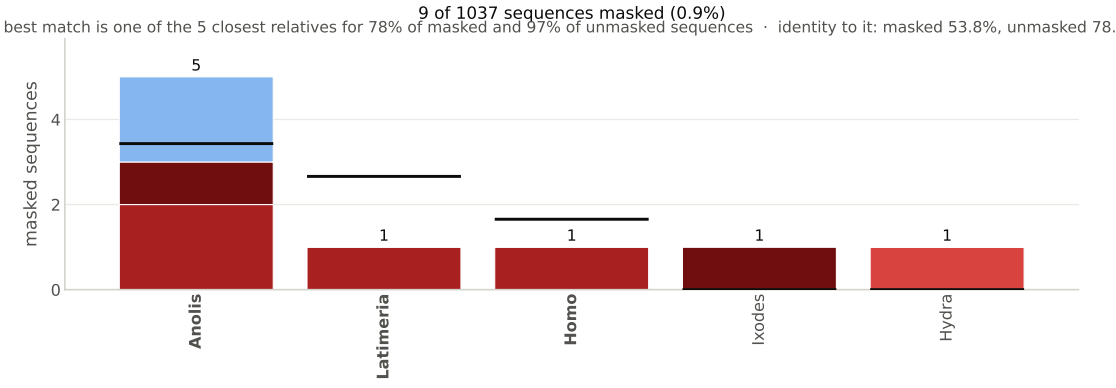

best match is one of the 5 closest relatives for 100% of masked and 97% of unmasked sequences · identity to it: masked 97.9%, unmasked 87.5%

Xenopus

9 of 1037 sequences masked (0.9%)

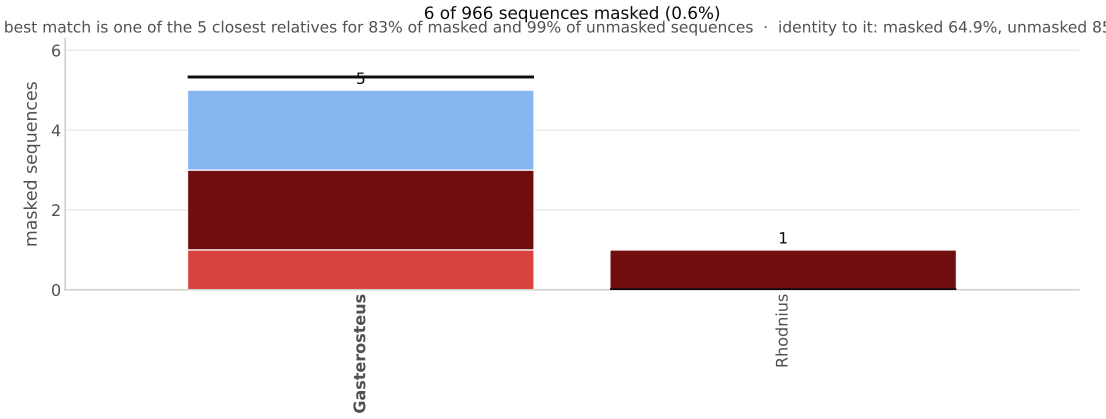

best match is one of the 5 closest relatives for 78% of masked and 97% of unmasked sequences · identity to it: masked 53.8%, unmasked 78.7%

Fugu

6 of 966 sequences masked (0.6%)

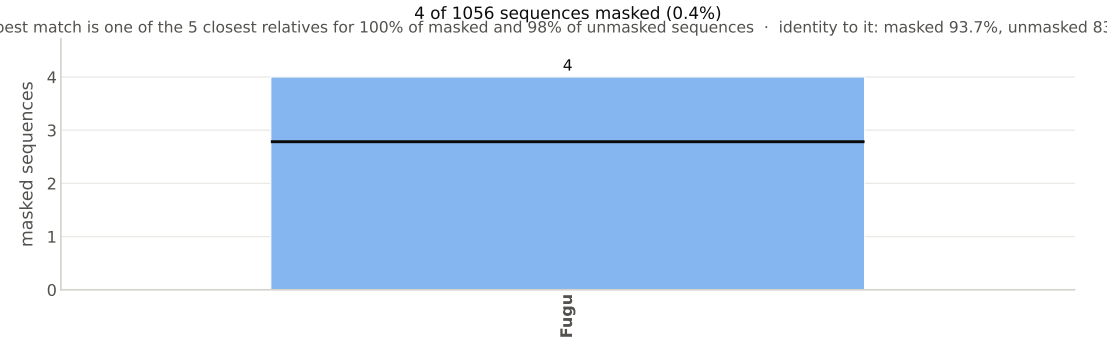

best match is one of the 5 closest relatives for 83% of masked and 99% of unmasked sequences · identity to it: masked 64.9%, unmasked 85.3%

Gasterosteus

4 of 1056 sequences masked (0.4%)

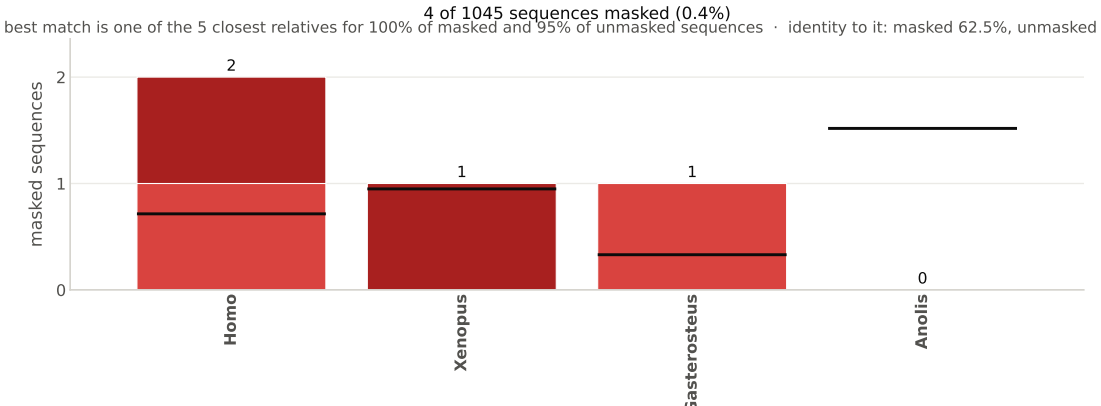

best match is one of the 5 closest relatives for 100% of masked and 98% of unmasked sequences · identity to it: masked 93.7%, unmasked 83.7%

Latimeria

4 of 1045 sequences masked (0.4%)

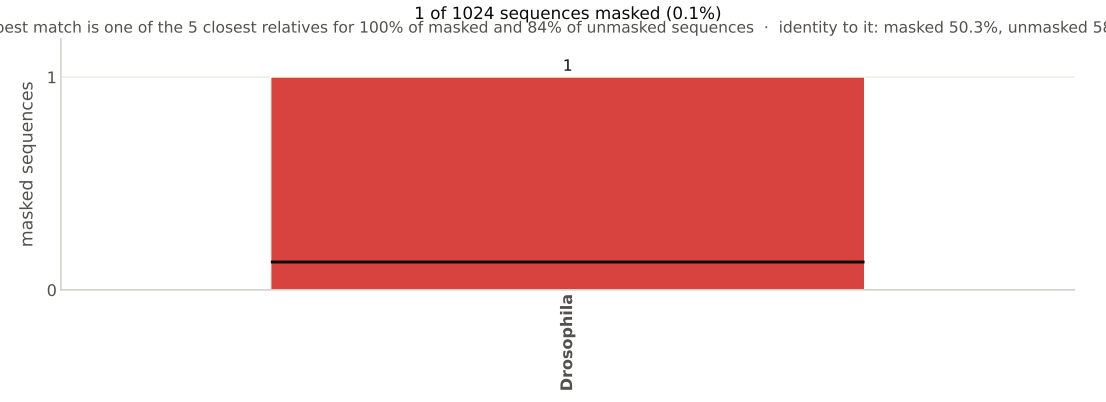

best match is one of the 5 closest relatives for 100% of masked and 95% of unmasked sequences · identity to it: masked 62.5%, unmasked 78.4%

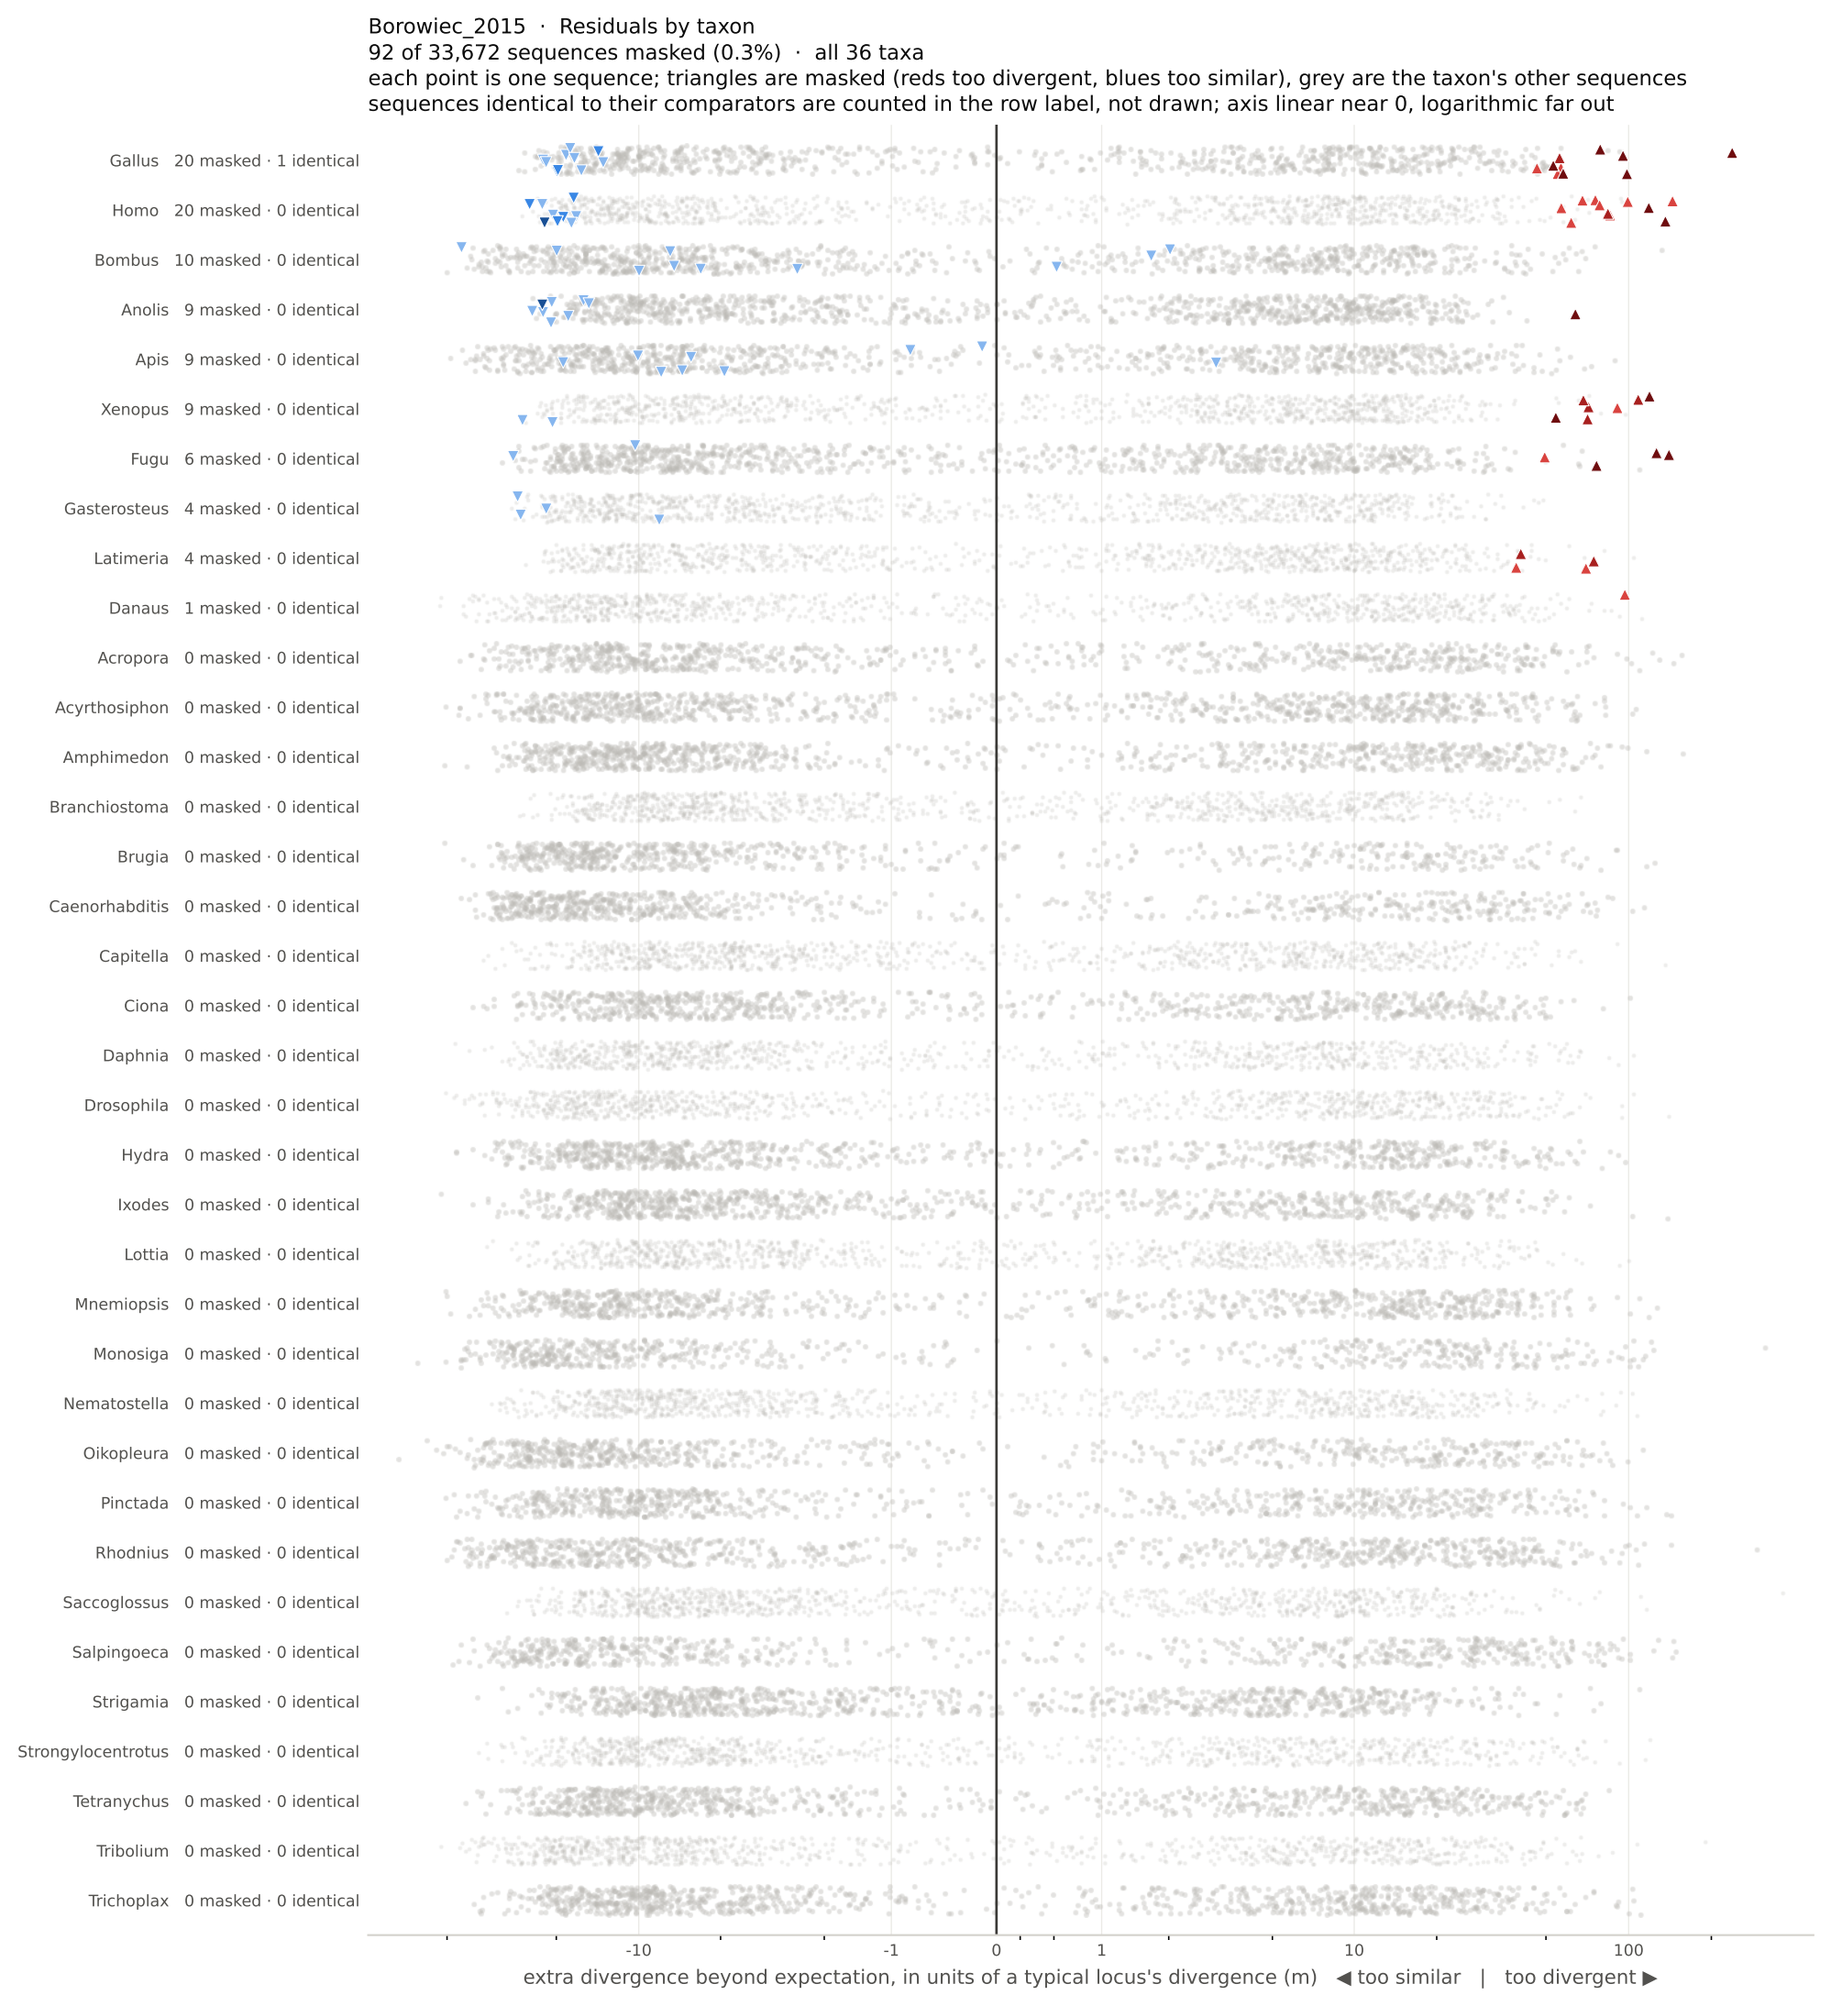

Danaus

1 of 1024 sequences masked (0.1%)

best match is one of the 5 closest relatives for 100% of masked and 84% of unmasked sequences · identity to it: masked 50.3%, unmasked 58.8%

Borowiec_2015 · Residuals by taxon
92 of 33,672 sequences masked (0.3%) · all 36 taxa
each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the taxon's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out
