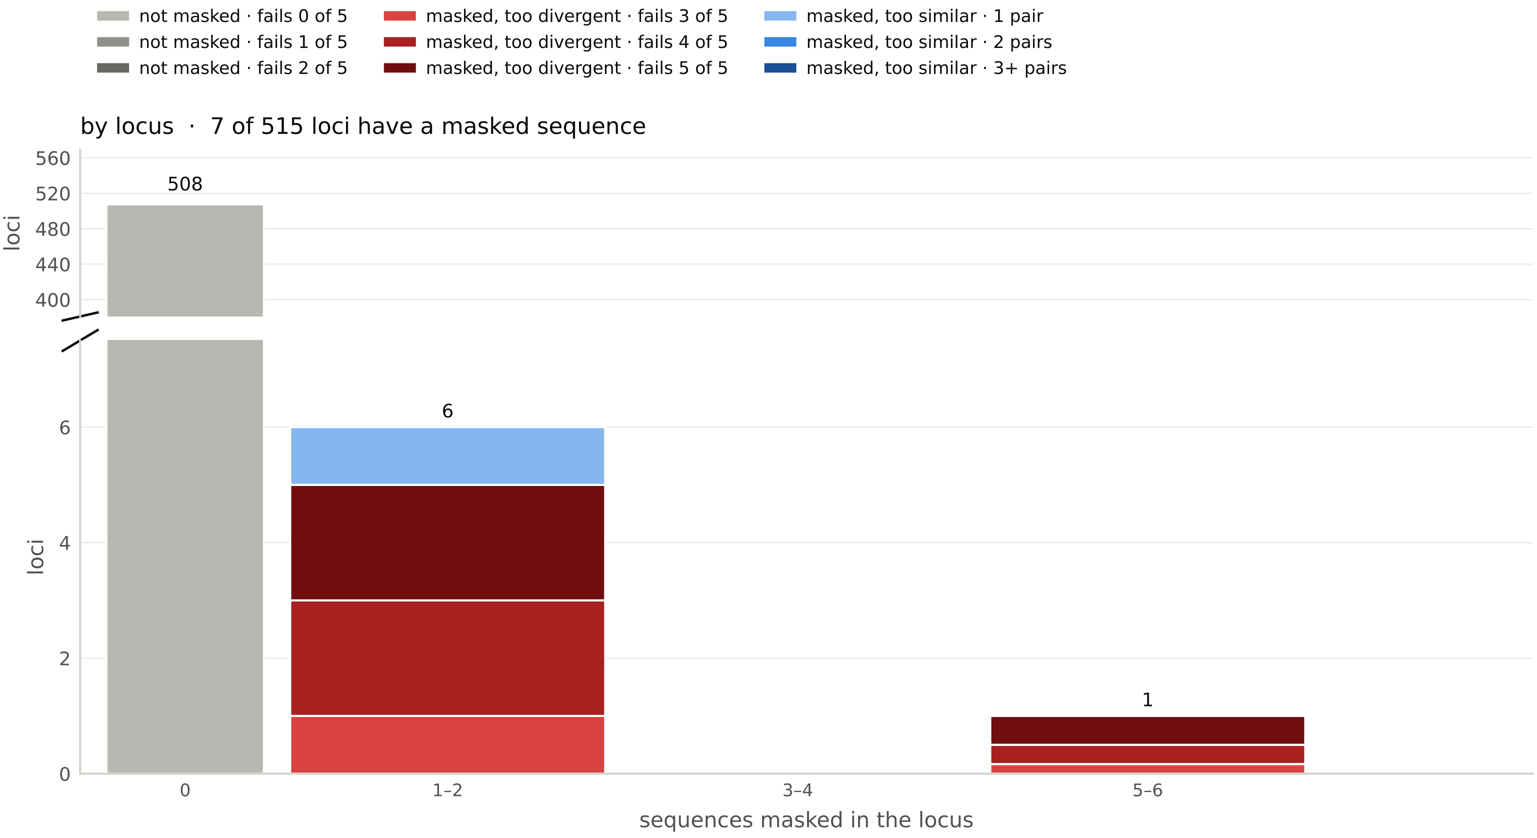
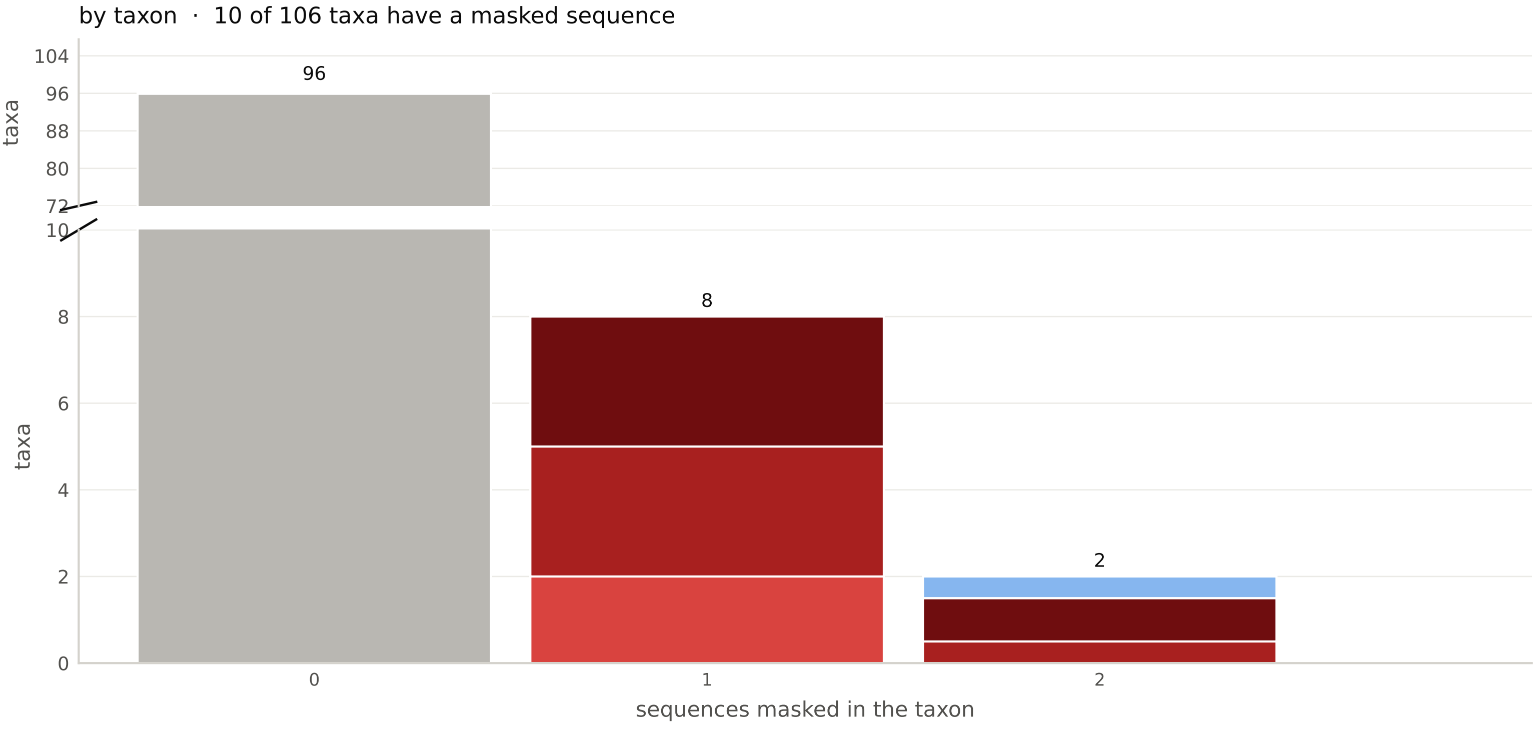
Moyle_2016 · Number of sequences masked per locus and per taxon

12 of 54,590 sequences masked (0.0%)



by locus · 7 of 515 loci have a masked sequence

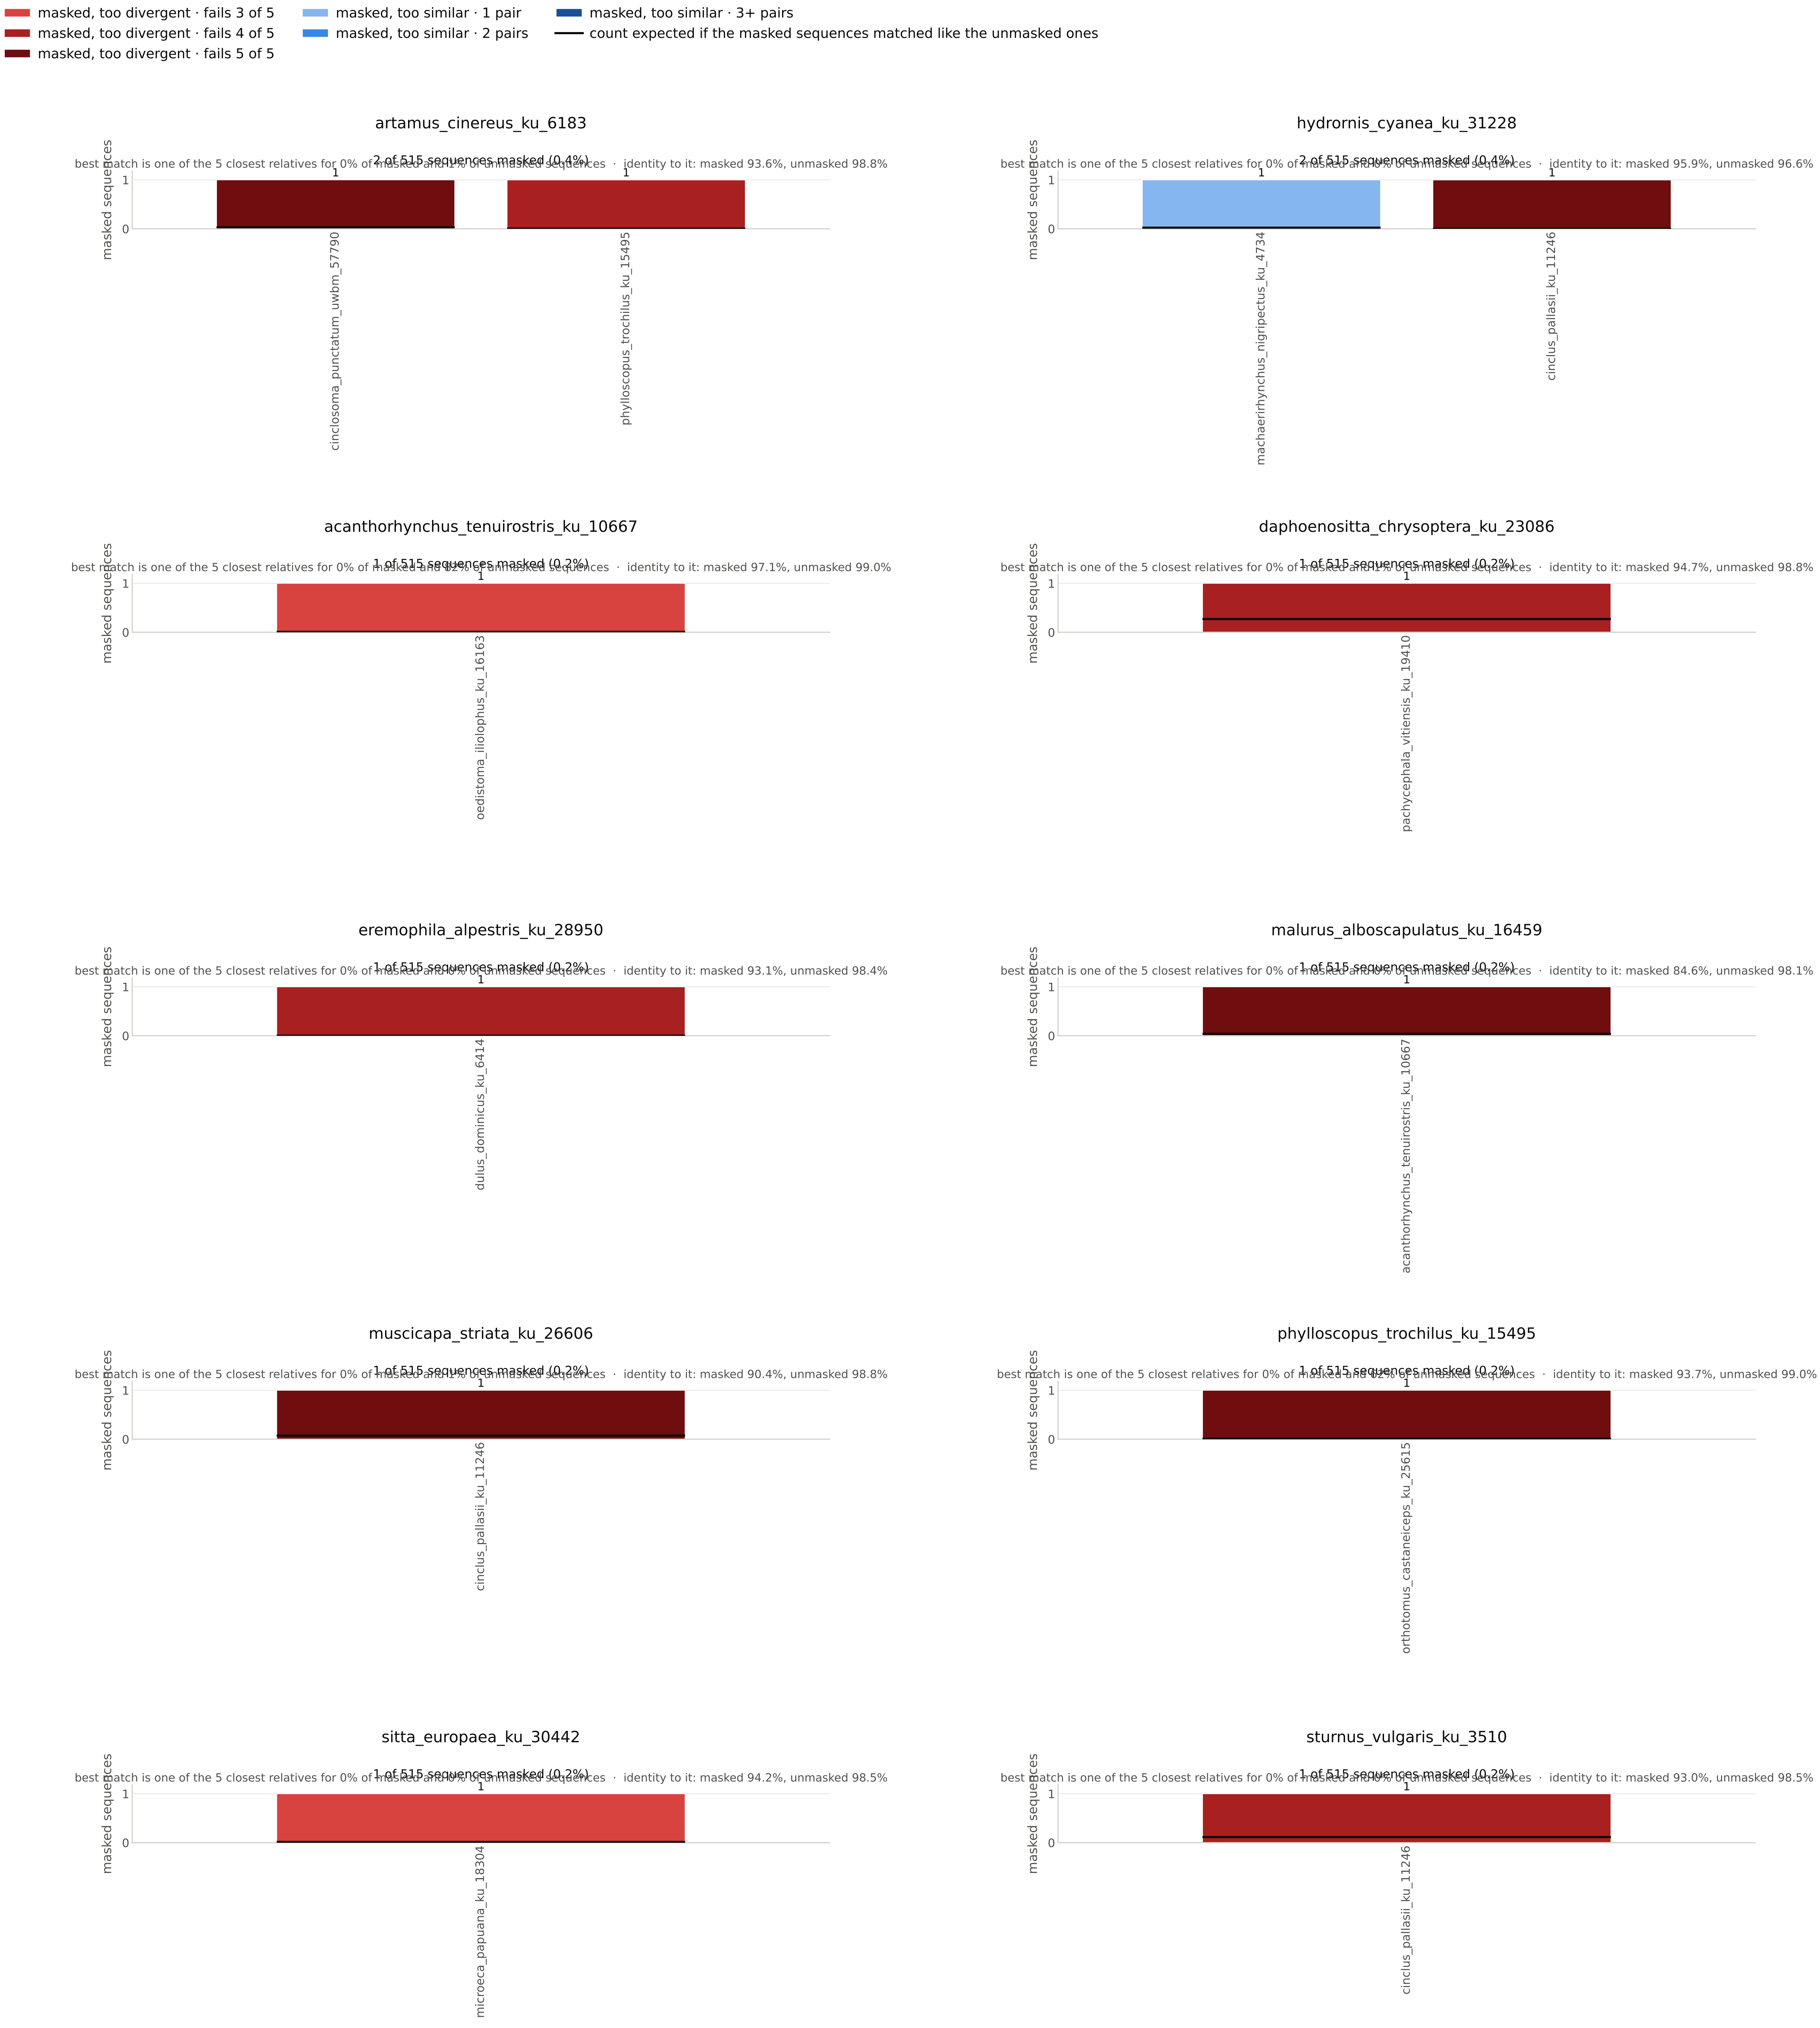


by taxon · 10 of 106 taxa have a masked sequence

Moyle_2016 · Best match of each masked sequence

12 of 54,590 sequences masked (0.0%)

the 10 most masked taxa; each masked sequence is matched against every other taxon at its locus (identity over the masked sequence's sites, a site the other taxon lacks counting as a mismatch; ties to the closest relative genome-wide); bars count masked sequences by the taxon they match best; the tick is the count expected if they matched like the taxon's unmasked sequences; bold: the 5 closest relatives genome-wide



Moyle_2016 · Residuals by taxon
12 of 54,590 sequences masked (0.0%) · the 100 most masked of 106 taxa
each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the taxon's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out

extra divergence beyond expectation, in units of a typical locus's divergence (m) ◀ too similar | too divergent ▶

Moyle_2016 · Residuals by locus
12 of 54,590 sequences masked (0.0%) · the 100 most masked of 515 loci
each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the locus's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out; shaded = where a saturated sequence would land
