Leache_2015 · Taxon plot

8 of 6,183 sequences masked (0.1%)

each point represents a single sequence (a single locus in a single taxon), diagonal line is where the observed is the same as the expected divergence

each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the taxon's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out
