Moyle_2016 · Taxon plot

11 of 54,590 sequences masked (0.0%)

each point represents a single sequence (a single locus in a single taxon), diagonal line is where the observed is the same as the expected divergence · the 100 most masked of 106 taxa are shown

not masked · fails 0 of 5
not masked · fails 1 of 5
not masked · fails 2 of 5
masked, too divergent · fails 3 of 5
masked, too divergent · fails 4 of 5
masked, too divergent · fails 5 of 5
masked, too similar · 1 pair
masked, too similar · 2 pairs
masked, too similar · 3+ pairs

observed divergence of the cell, median over its comparators (%)

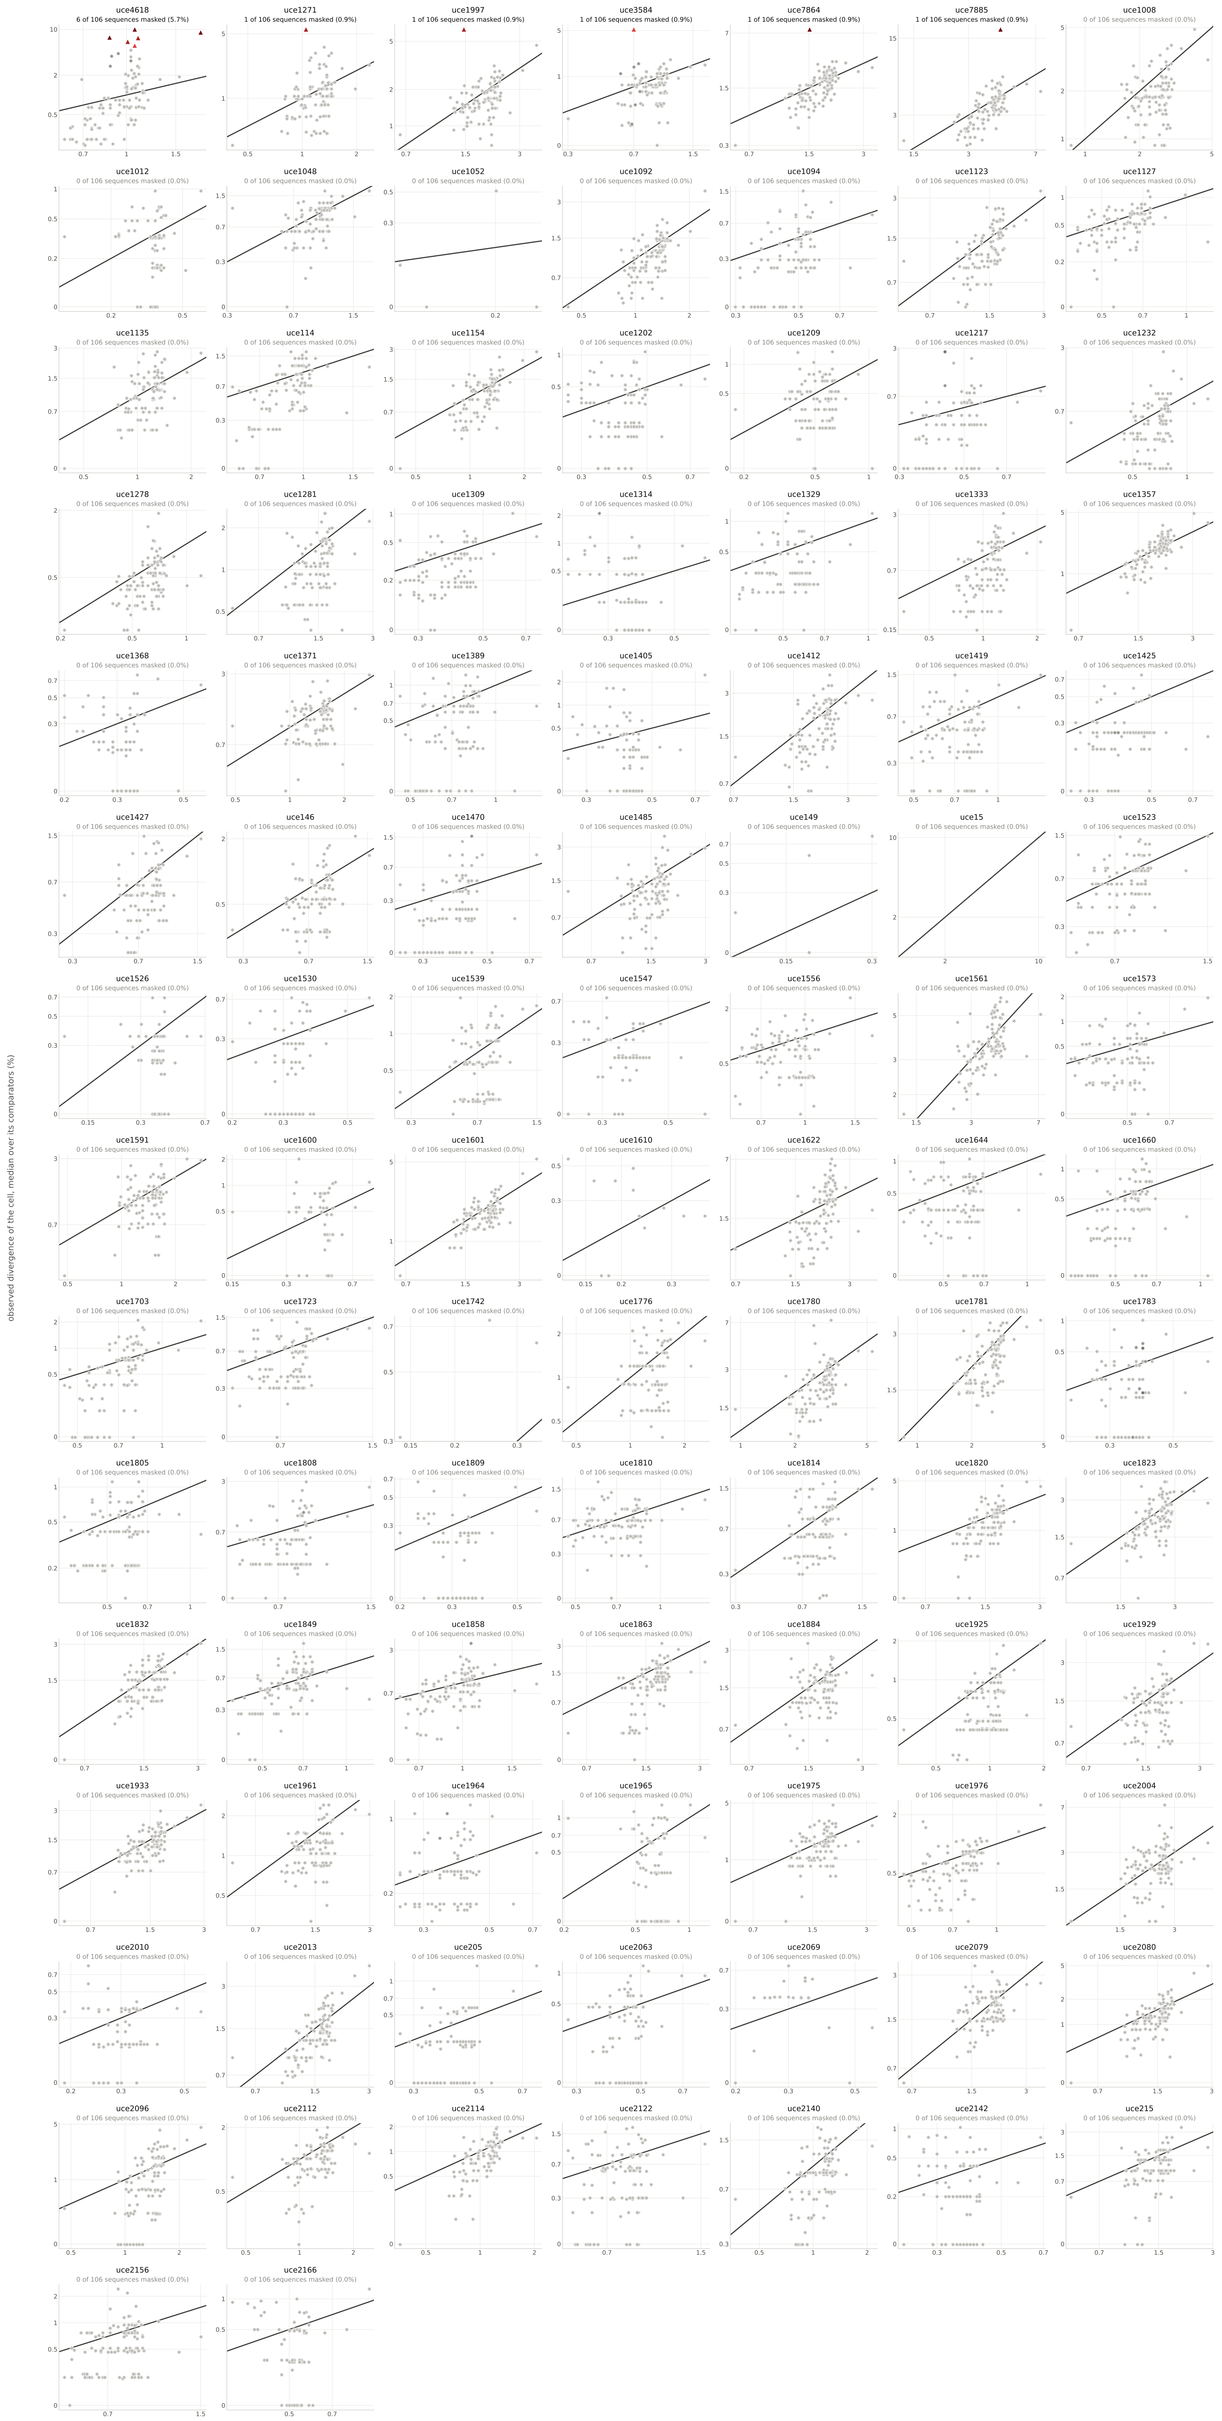

expected divergence of the cell, median over its comparators (%)

Moyle_2016 · Locus plot

11 of 54,590 sequences masked (0.0%)

each point represents a single sequence (a single locus in a single taxon), diagonal line is where the observed is the same as the expected divergence · the 100 most masked of 515 loci are shown

not masked · fails 0 of 5
not masked · fails 1 of 5
not masked · fails 2 of 5
masked, too divergent · fails 3 of 5
masked, too divergent · fails 4 of 5
masked, too divergent · fails 5 of 5
masked, too similar · 1 pair
masked, too similar · 2 pairs
masked, too similar · 3+ pairs

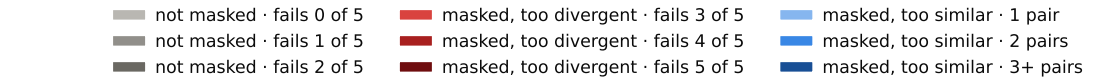

observed divergence of the cell, median over its comparators (%)

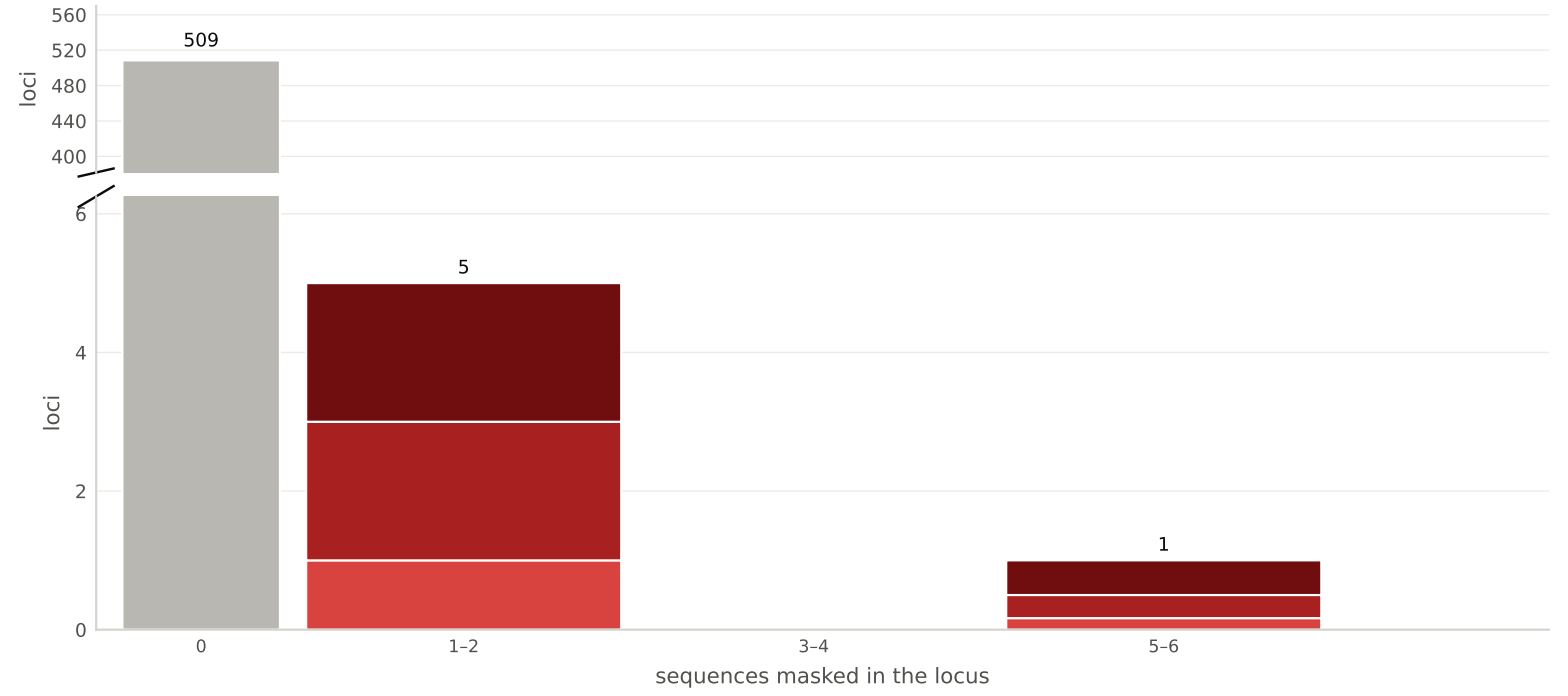

expected divergence of the cell, median over its comparators (%)

Moyle_2016 · Number of sequences masked per locus and per taxon

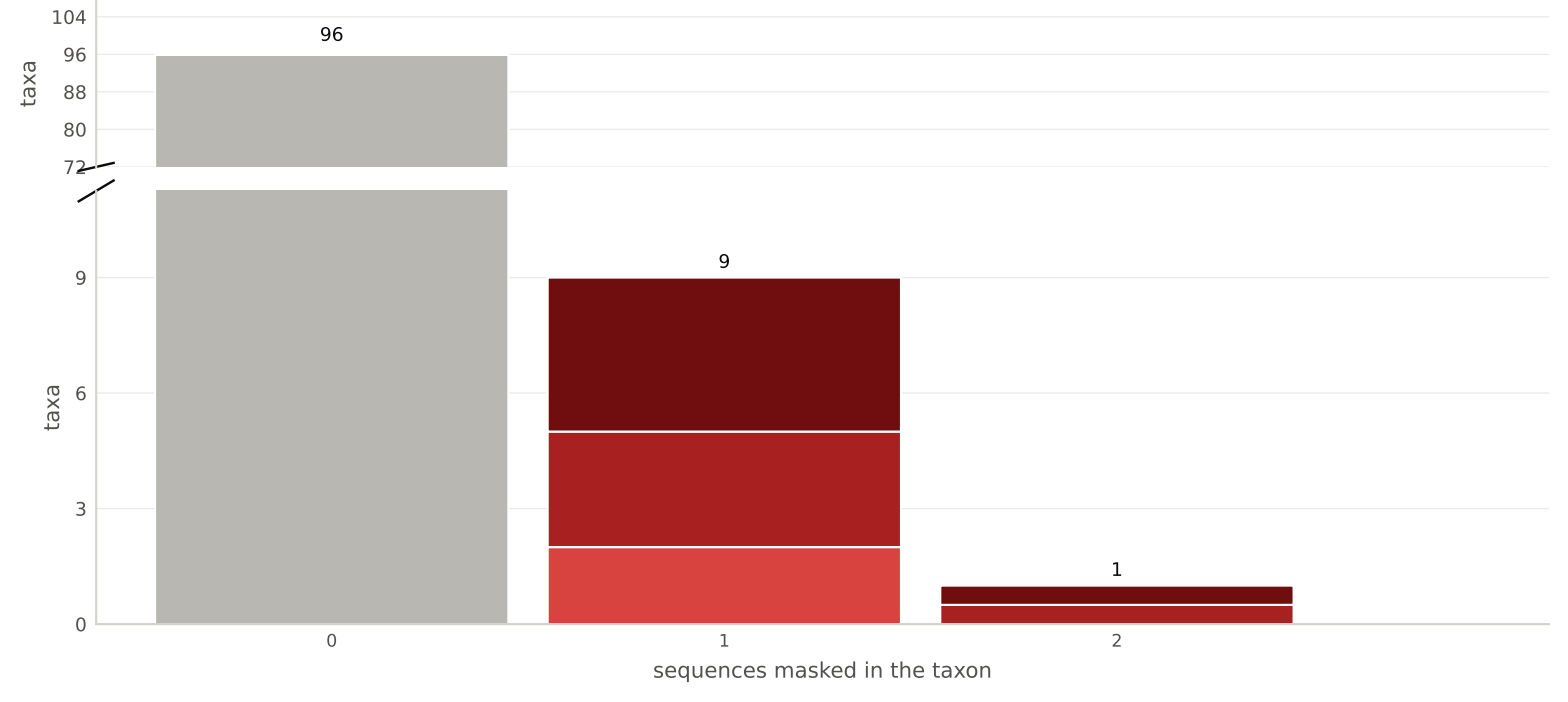

11 of 54,590 sequences masked (0.0%)

by locus · 6 of 515 loci have a masked sequence

by taxon · 10 of 106 taxa have a masked sequence

Moyle_2016 · Residuals by taxon
11 of 54,590 sequences masked (0.0%) · the 100 most masked of 106 taxa
each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the taxon's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out

Moyle_2016 · Residuals by locus
11 of 54,590 sequences masked (0.0%) · the 100 most masked of 515 loci
each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the locus's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out; shaded = where a saturated sequence would land
