Faircloth_2013 · Taxon plot

16 of 10,076 sequences masked (0.2%)

each point represents a single sequence (a single locus in a single taxon), diagonal line is where the observed is the same as the expected divergence

observed divergence of the cell, median over its comparators (%)

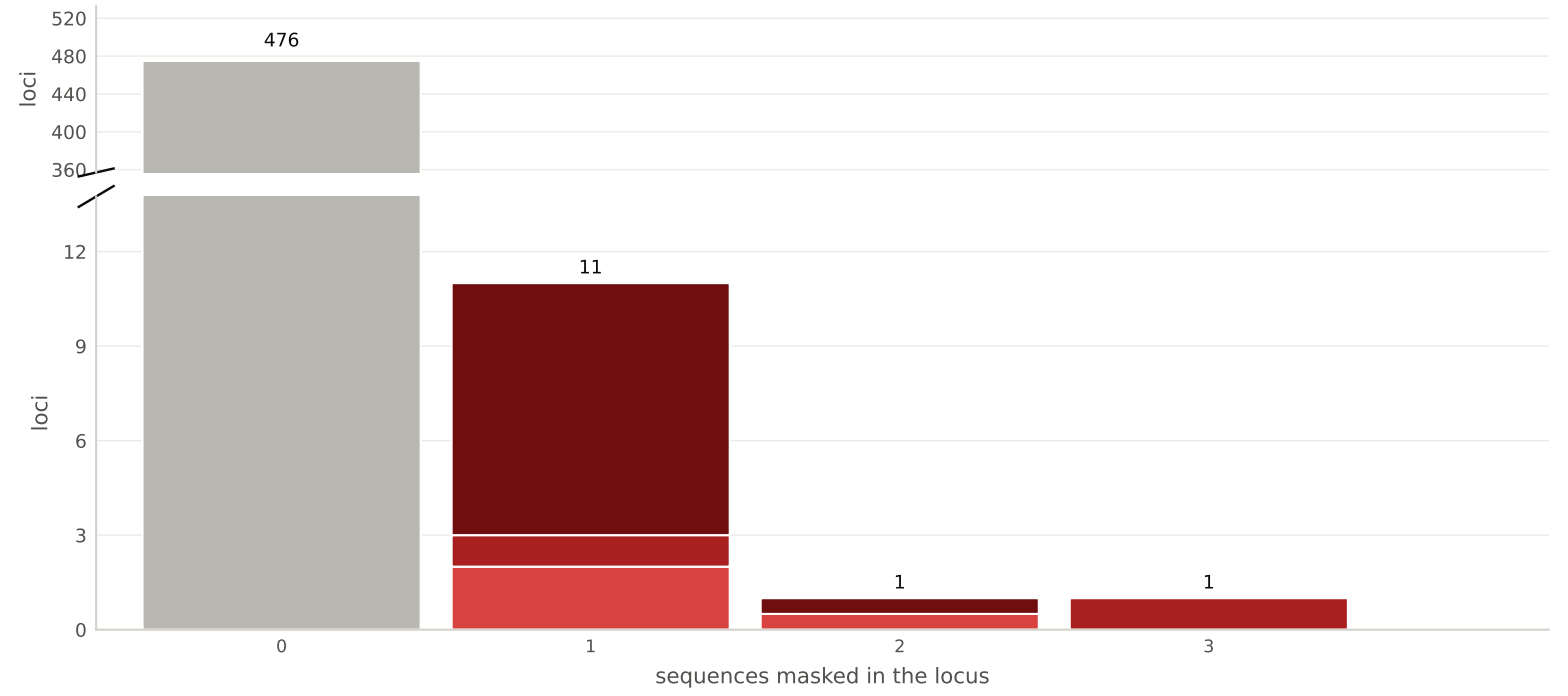

expected divergence of the cell, median over its comparators (%)

Faircloth_2013 · Number of sequences masked per locus and per taxon

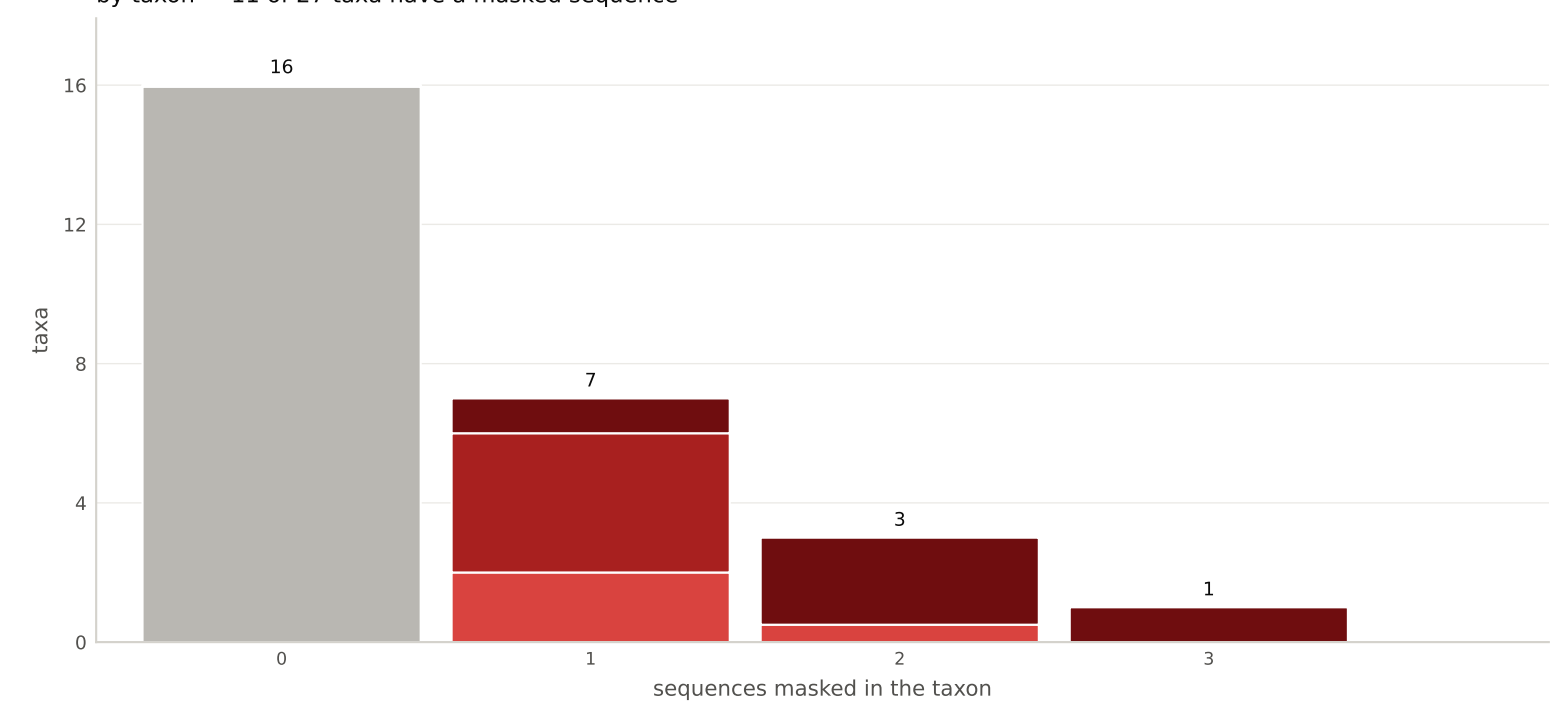

16 of 10,076 sequences masked (0.2%)

by locus · 13 of 489 loci have a masked sequence

by taxon · 11 of 27 taxa have a masked sequence

Faircloth_2013 · Best match of each masked sequence

16 of 10,076 sequences masked (0.2%)

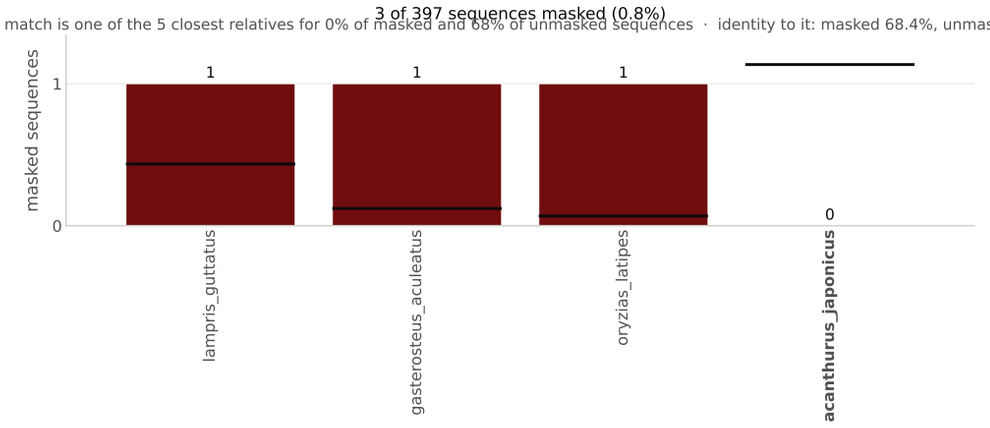

the 10 most masked taxa; a sequence's best match is the taxon closest to it at its locus, per-site divergence compared on the same sites (identity over the sites the pair shares; ties to the closest relative genome-wide); bars count masked sequences by the taxon they match best; the tick is the count expected if they matched like the taxon's unmasked sequences; bold: the 5 closest relatives genome-wide

masked, too similar · 1 pair
masked, too similar · 2 pairs
masked, too similar · 3+ pairs
count expected if the masked sequences matched like the unmasked ones

diaphus_theta

3 of 397 sequences masked (0.8%)

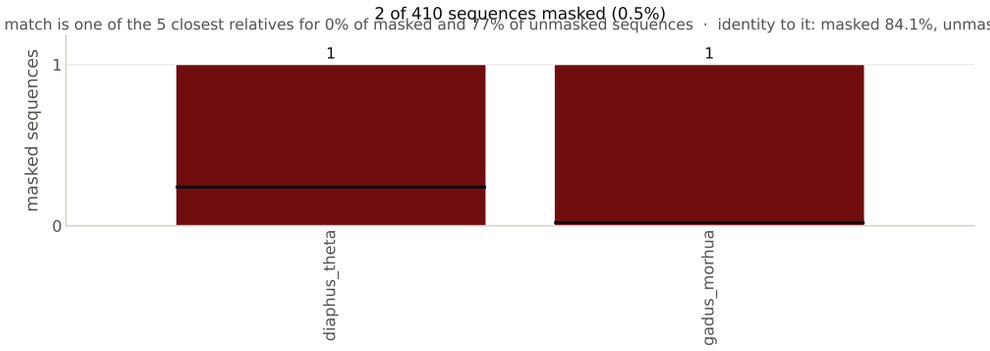

best match is one of the 5 closest relatives for 0% of masked and 68% of unmasked sequences · identity to it: masked 68.4%, unmasked 96.6%

lampris_guttatus

2 of 410 sequences masked (0.5%)

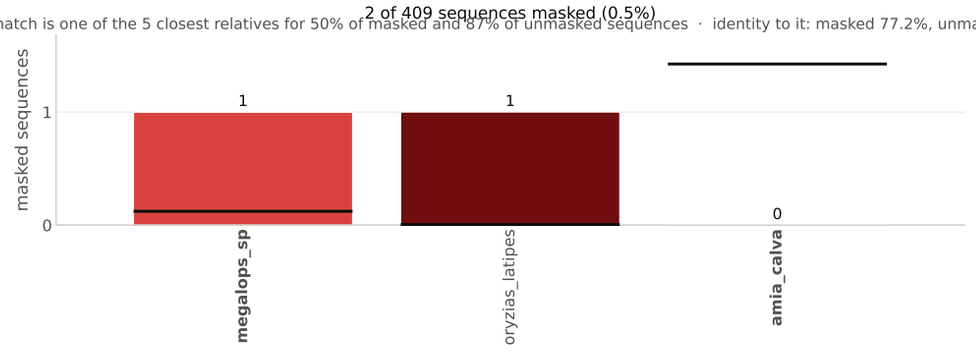

best match is one of the 5 closest relatives for 0% of masked and 77% of unmasked sequences · identity to it: masked 84.1%, unmasked 97.1%

lepisosteus_oculatus

2 of 409 sequences masked (0.5%)

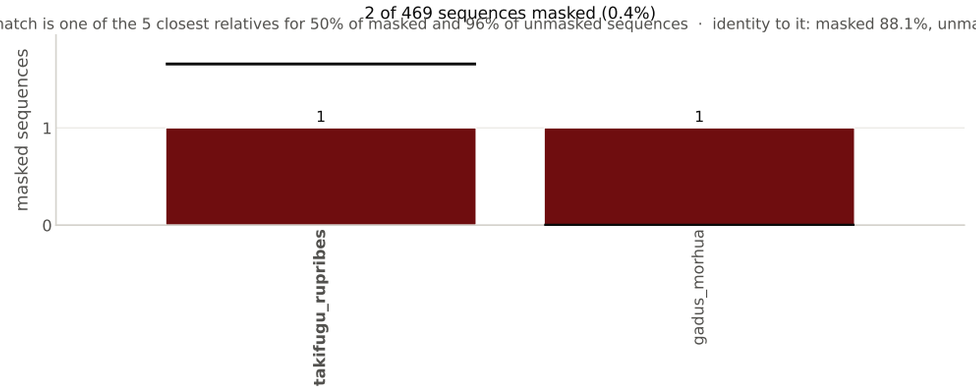

best match is one of the 5 closest relatives for 50% of masked and 87% of unmasked sequences · identity to it: masked 77.2%, unmasked 95.6%

tetraodon_nigroviridis

2 of 469 sequences masked (0.4%)

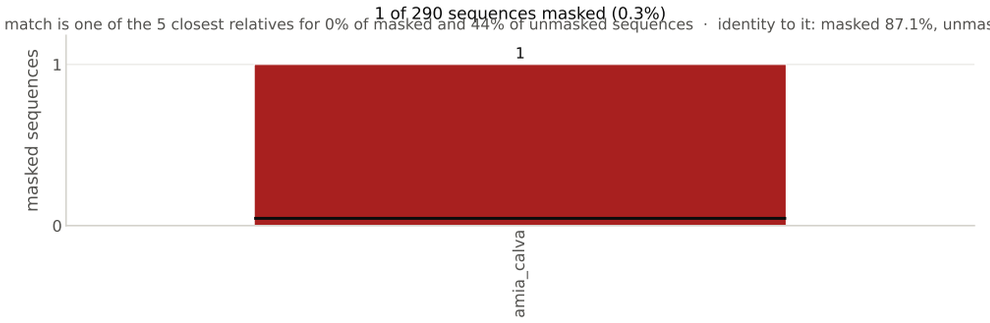

best match is one of the 5 closest relatives for 50% of masked and 96% of unmasked sequences · identity to it: masked 88.1%, unmasked 98.1%

anchoa_compressa

1 of 290 sequences masked (0.3%)

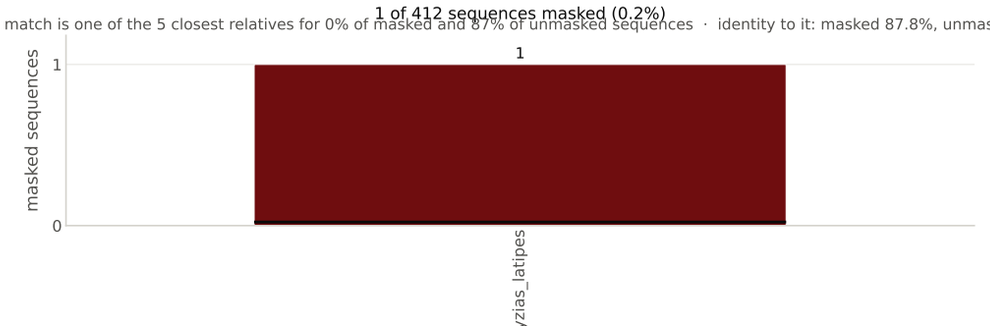

best match is one of the 5 closest relatives for 0% of masked and 44% of unmasked sequences · identity to it: masked 87.1%, unmasked 90.5%

antennarius_striatus

1 of 412 sequences masked (0.2%)

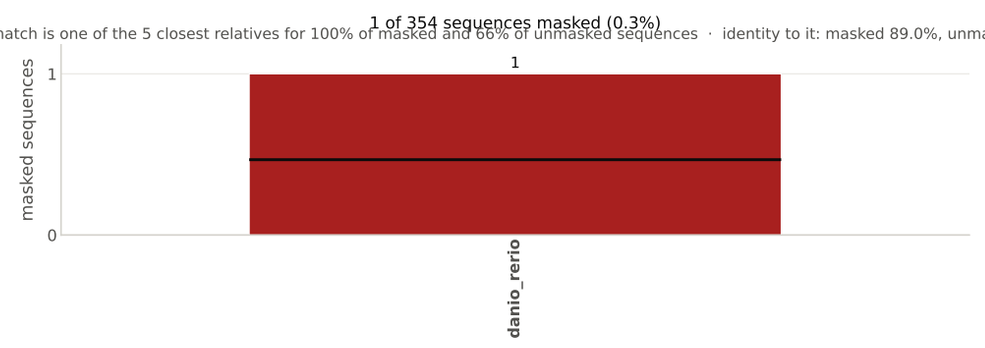

best match is one of the 5 closest relatives for 0% of masked and 87% of unmasked sequences · identity to it: masked 87.8%, unmasked 98.1%

astyanax_fasciatus

1 of 354 sequences masked (0.3%)

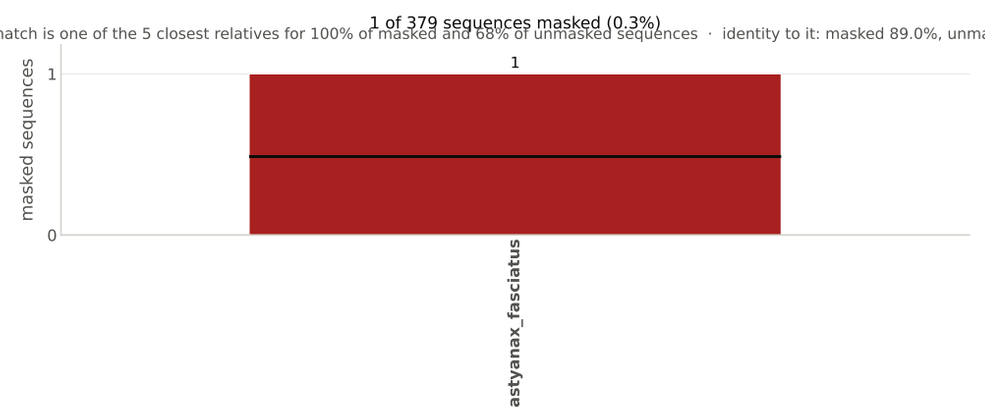

best match is one of the 5 closest relatives for 100% of masked and 66% of unmasked sequences · identity to it: masked 89.0%, unmasked 92.0%

danio_rerio

1 of 379 sequences masked (0.3%)

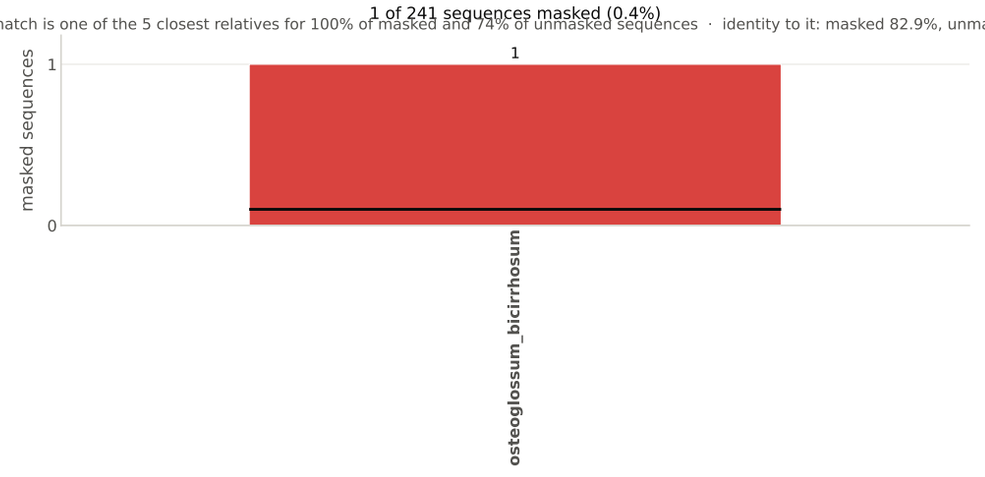

best match is one of the 5 closest relatives for 100% of masked and 68% of unmasked sequences · identity to it: masked 89.0%, unmasked 91.4%

megalops_sp

1 of 241 sequences masked (0.4%)

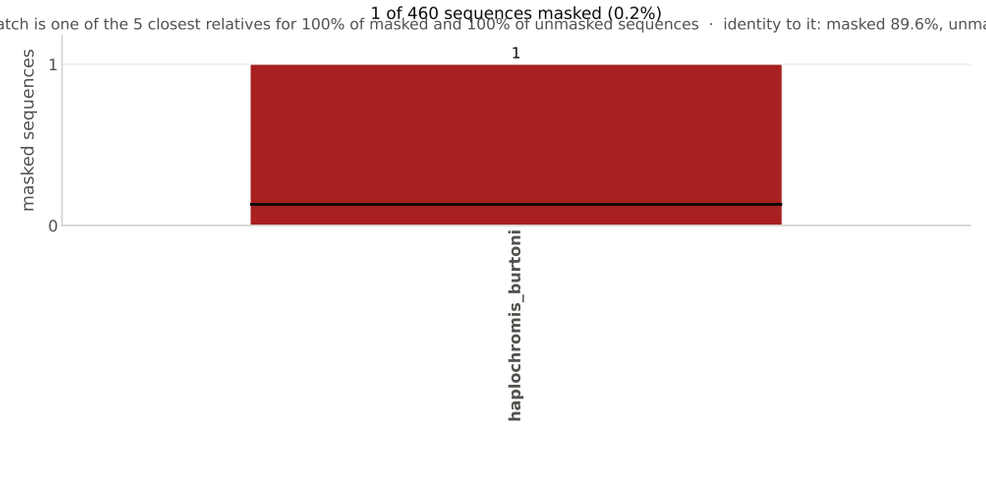

best match is one of the 5 closest relatives for 100% of masked and 74% of unmasked sequences · identity to it: masked 82.9%, unmasked 94.3%

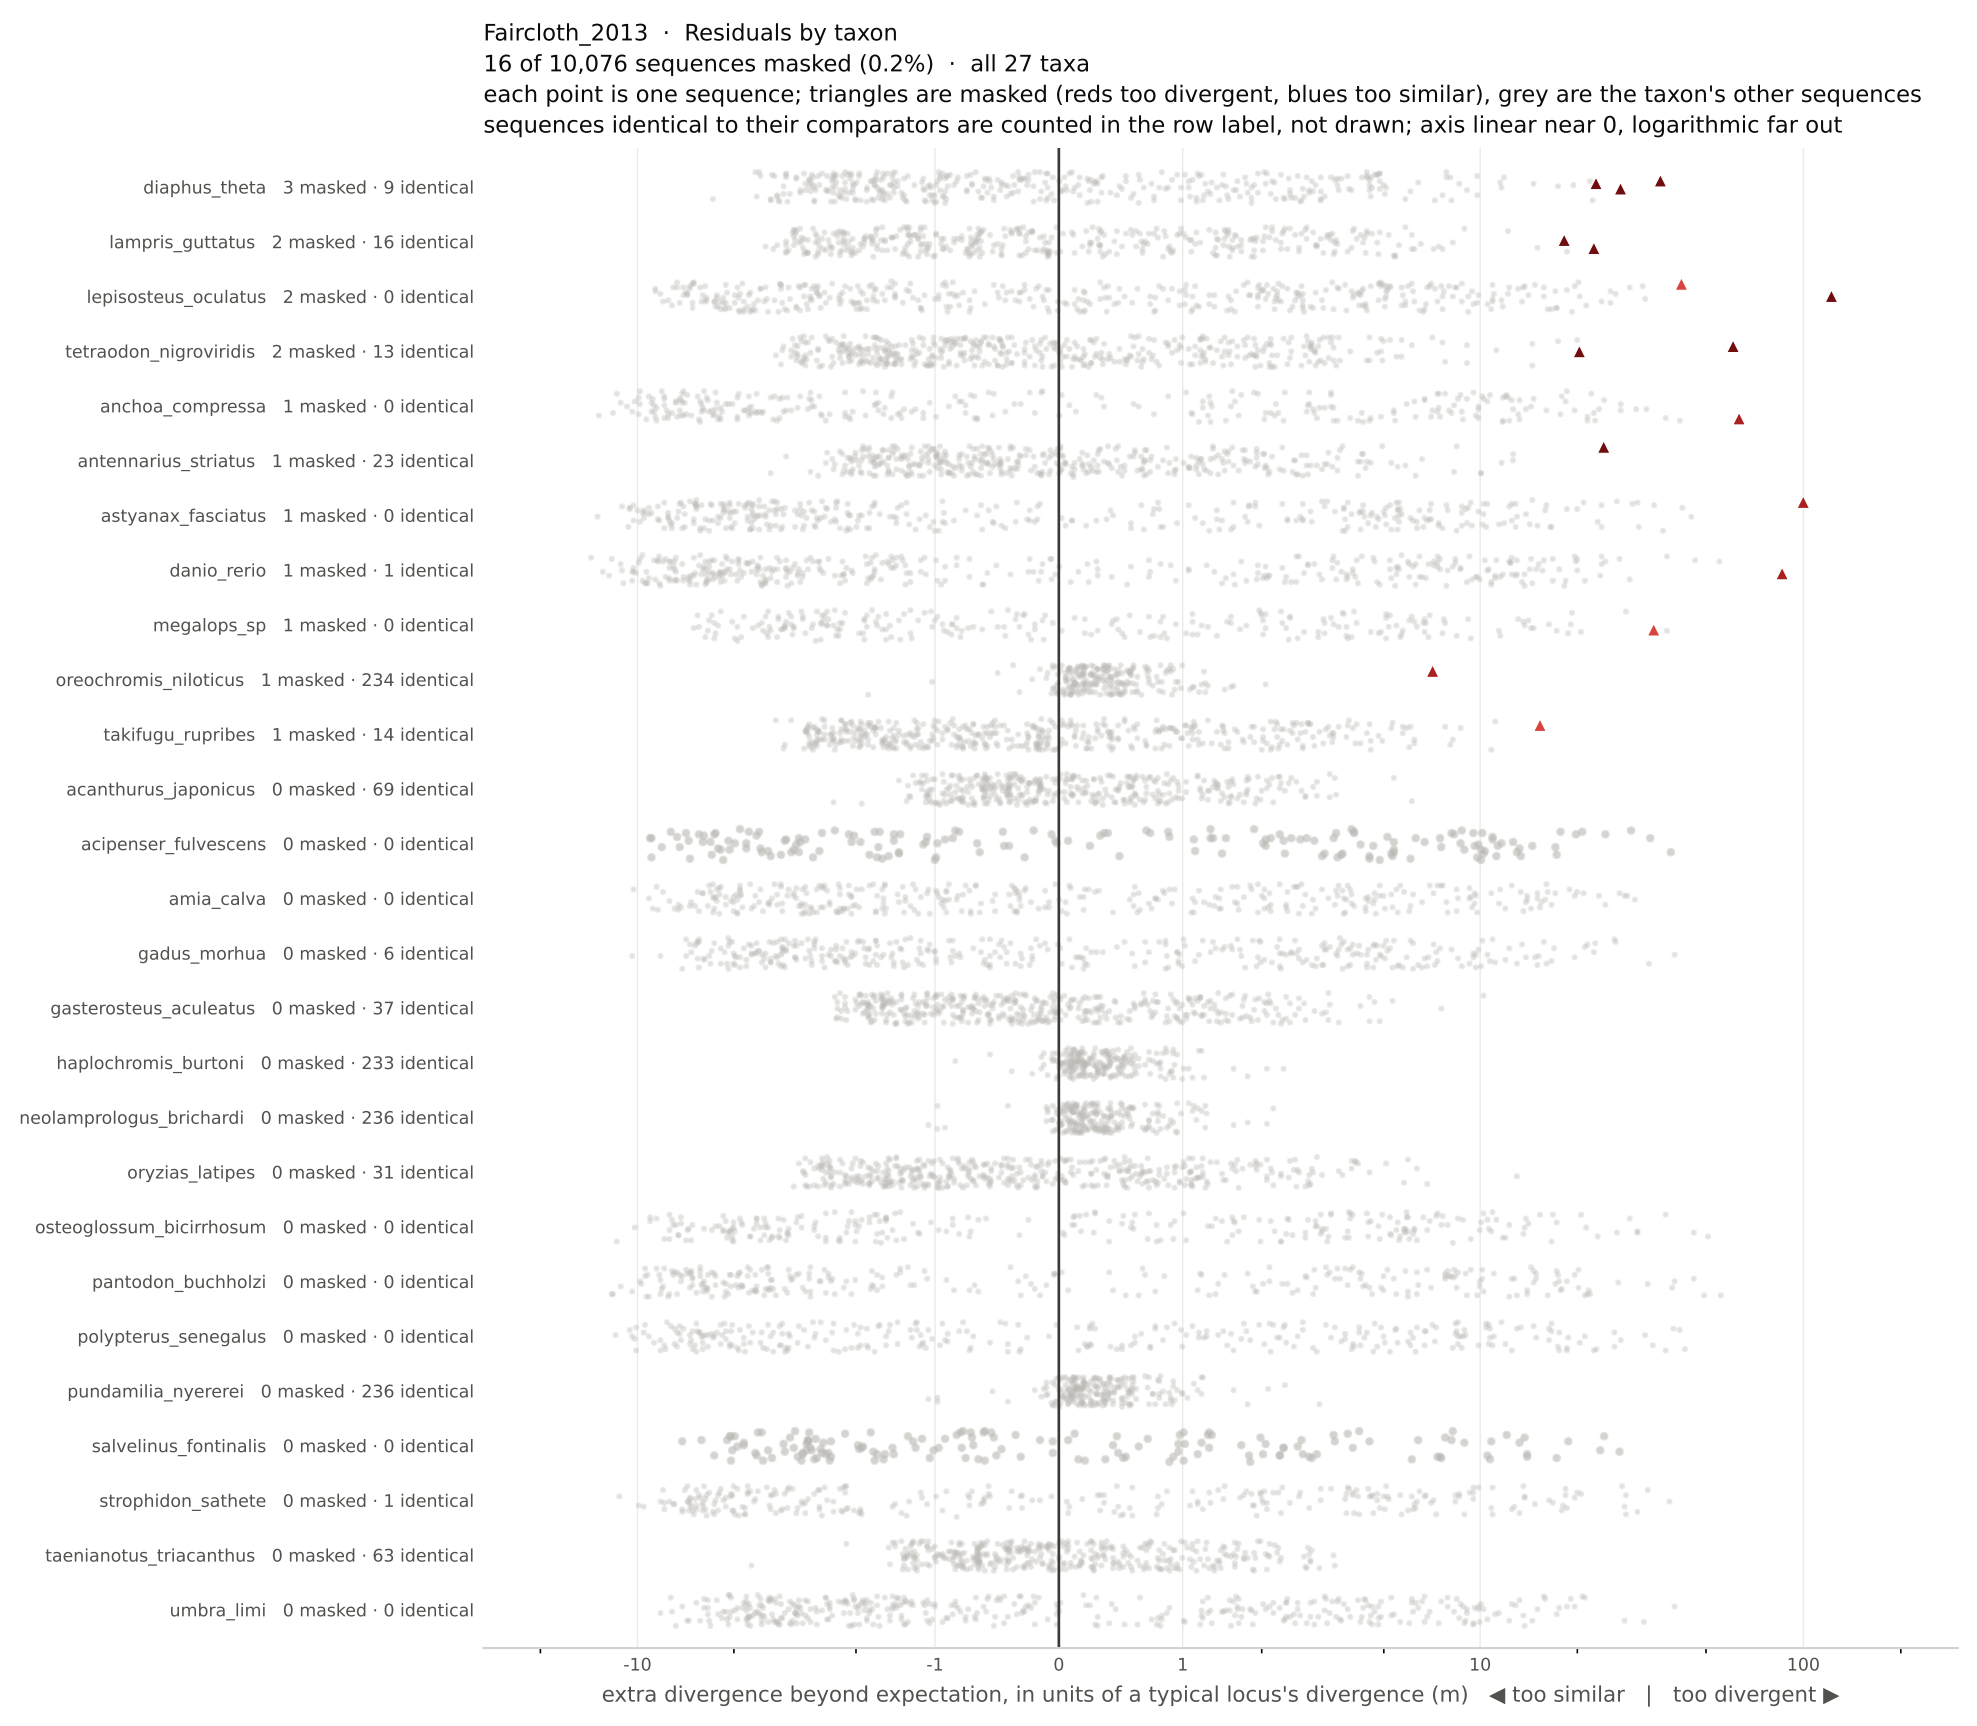

oreochromis_niloticus

1 of 460 sequences masked (0.2%)

best match is one of the 5 closest relatives for 100% of masked and 100% of unmasked sequences · identity to it: masked 89.6%, unmasked 100.0%

Faircloth_2013 · Residuals by taxon
16 of 10,076 sequences masked (0.2%) · all 27 taxa
each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the taxon's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out
