Pyron_2011 · Taxon plot

1 of 1,720 sequences masked (0.1%)

each point represents a single sequence (a single locus in a single taxon), diagonal line is where the observed is the same as the expected divergence · the 100 most masked of 160 taxa are shown

not masked · fails 0 of 5
not masked · fails 1 of 5
not masked · fails 2 of 5
masked, too divergent · fails 3 of 5
masked, too divergent · fails 4 of 5
masked, too divergent · fails 5 of 5
masked, too similar · 1 pair
masked, too similar · 2 pairs
masked, too similar · 3+ pairs

observed divergence of the cell, median over its comparators (%)

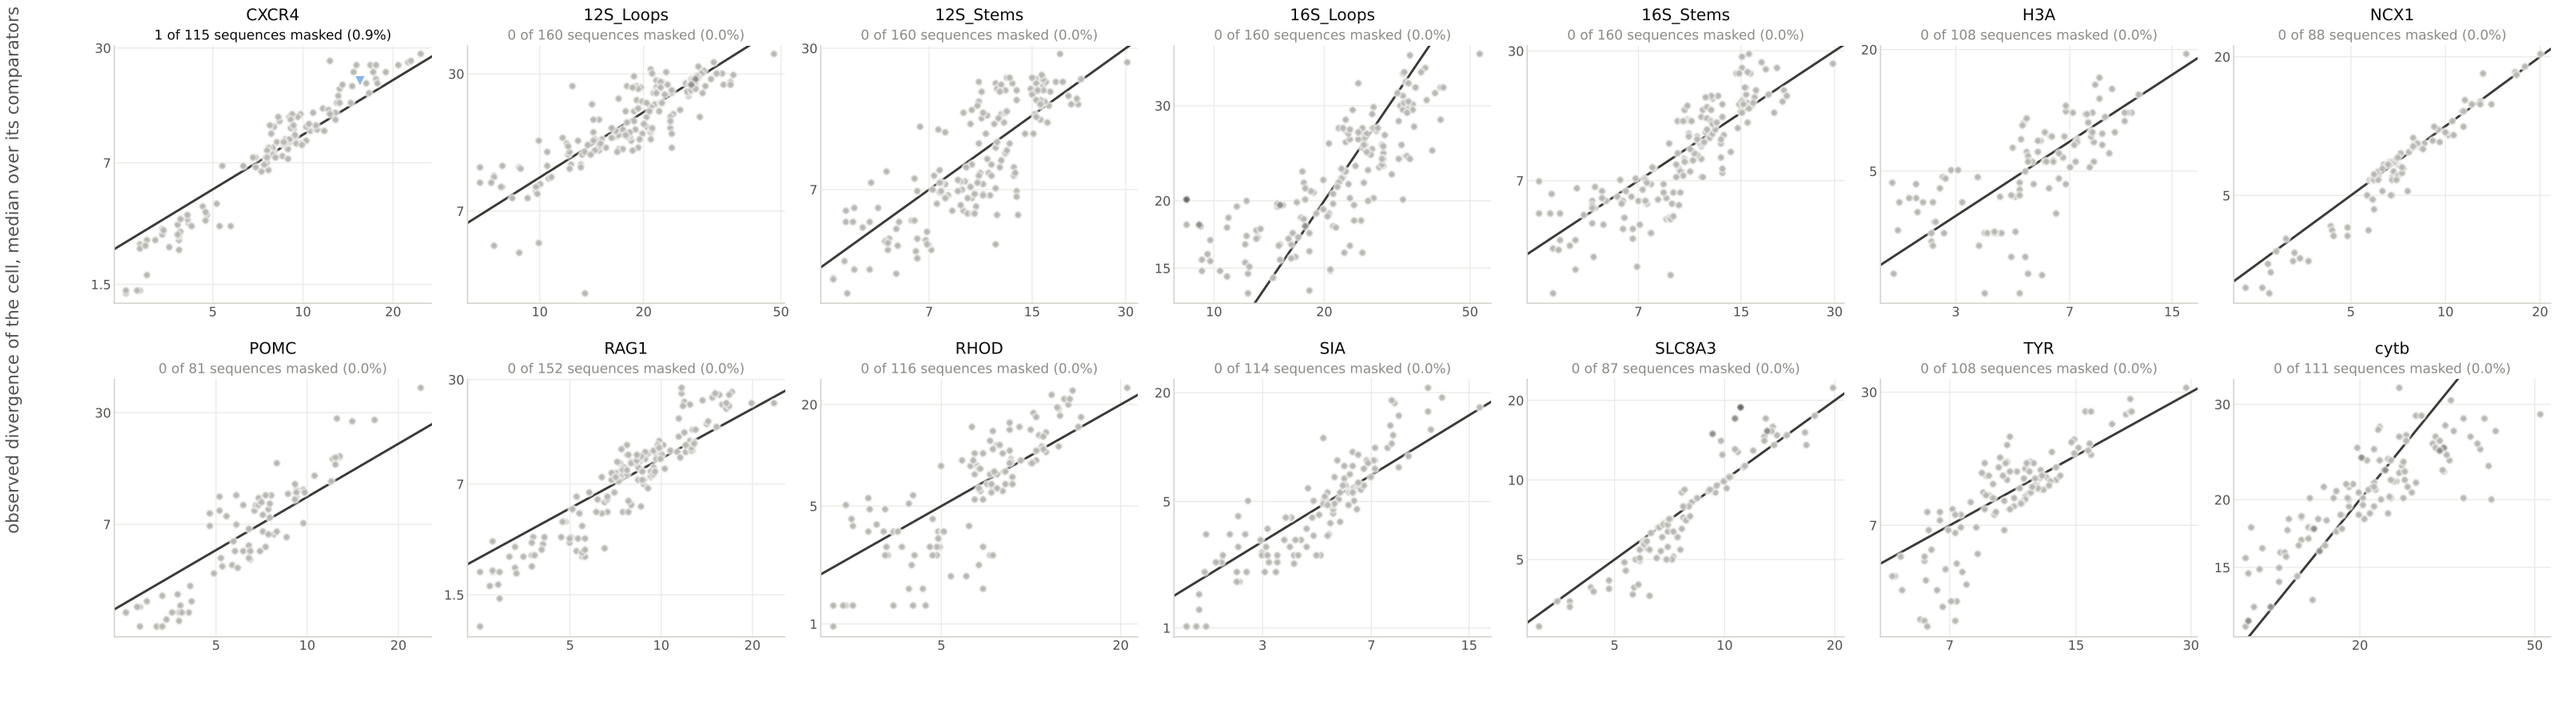

expected divergence of the cell, median over its comparators (%)

Pyron_2011 · Locus plot

Pyron_2011 · Number of sequences masked per locus and per taxon

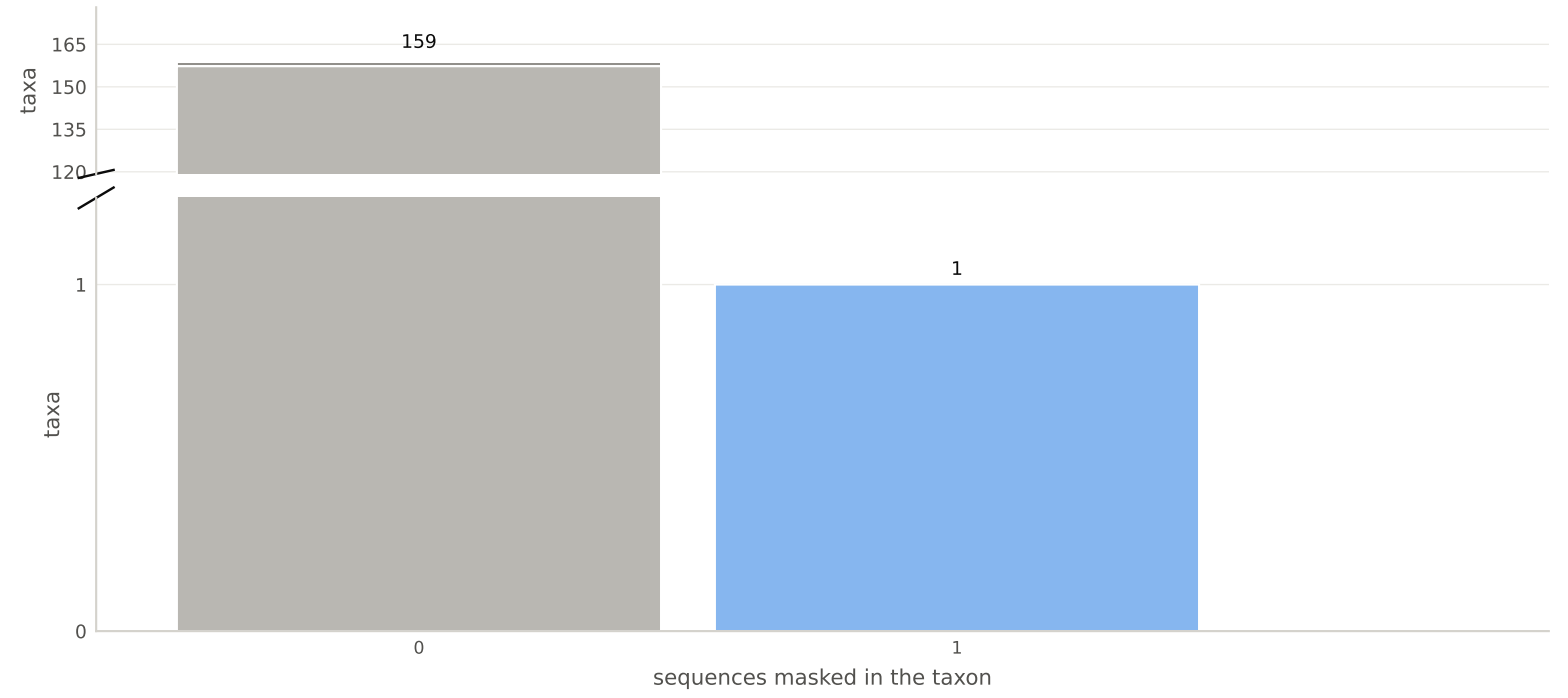

1 of 1,720 sequences masked (0.1%)

by locus · 1 of 14 loci have a masked sequence

by taxon · 1 of 160 taxa have a masked sequence

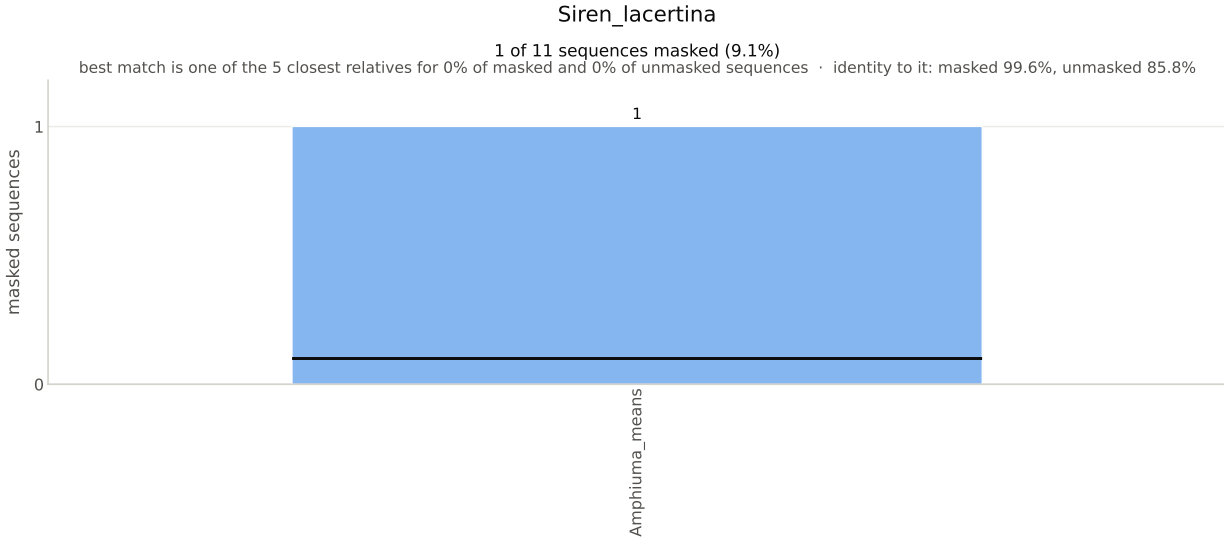

Pyron_2011 · Best match of each masked sequence

1 of 1,720 sequences masked (0.1%)

the 1 most masked taxa; a sequence's best match is the taxon closest to it at its locus, per-site divergence compared on the same sites (identity over the sites the pair shares; ties to the closest relative genome-wide); bars count masked sequences by the taxon they match best; the tick is the count expected if they matched like the taxon's unmasked sequences; bold: the 5 closest relatives genome-wide

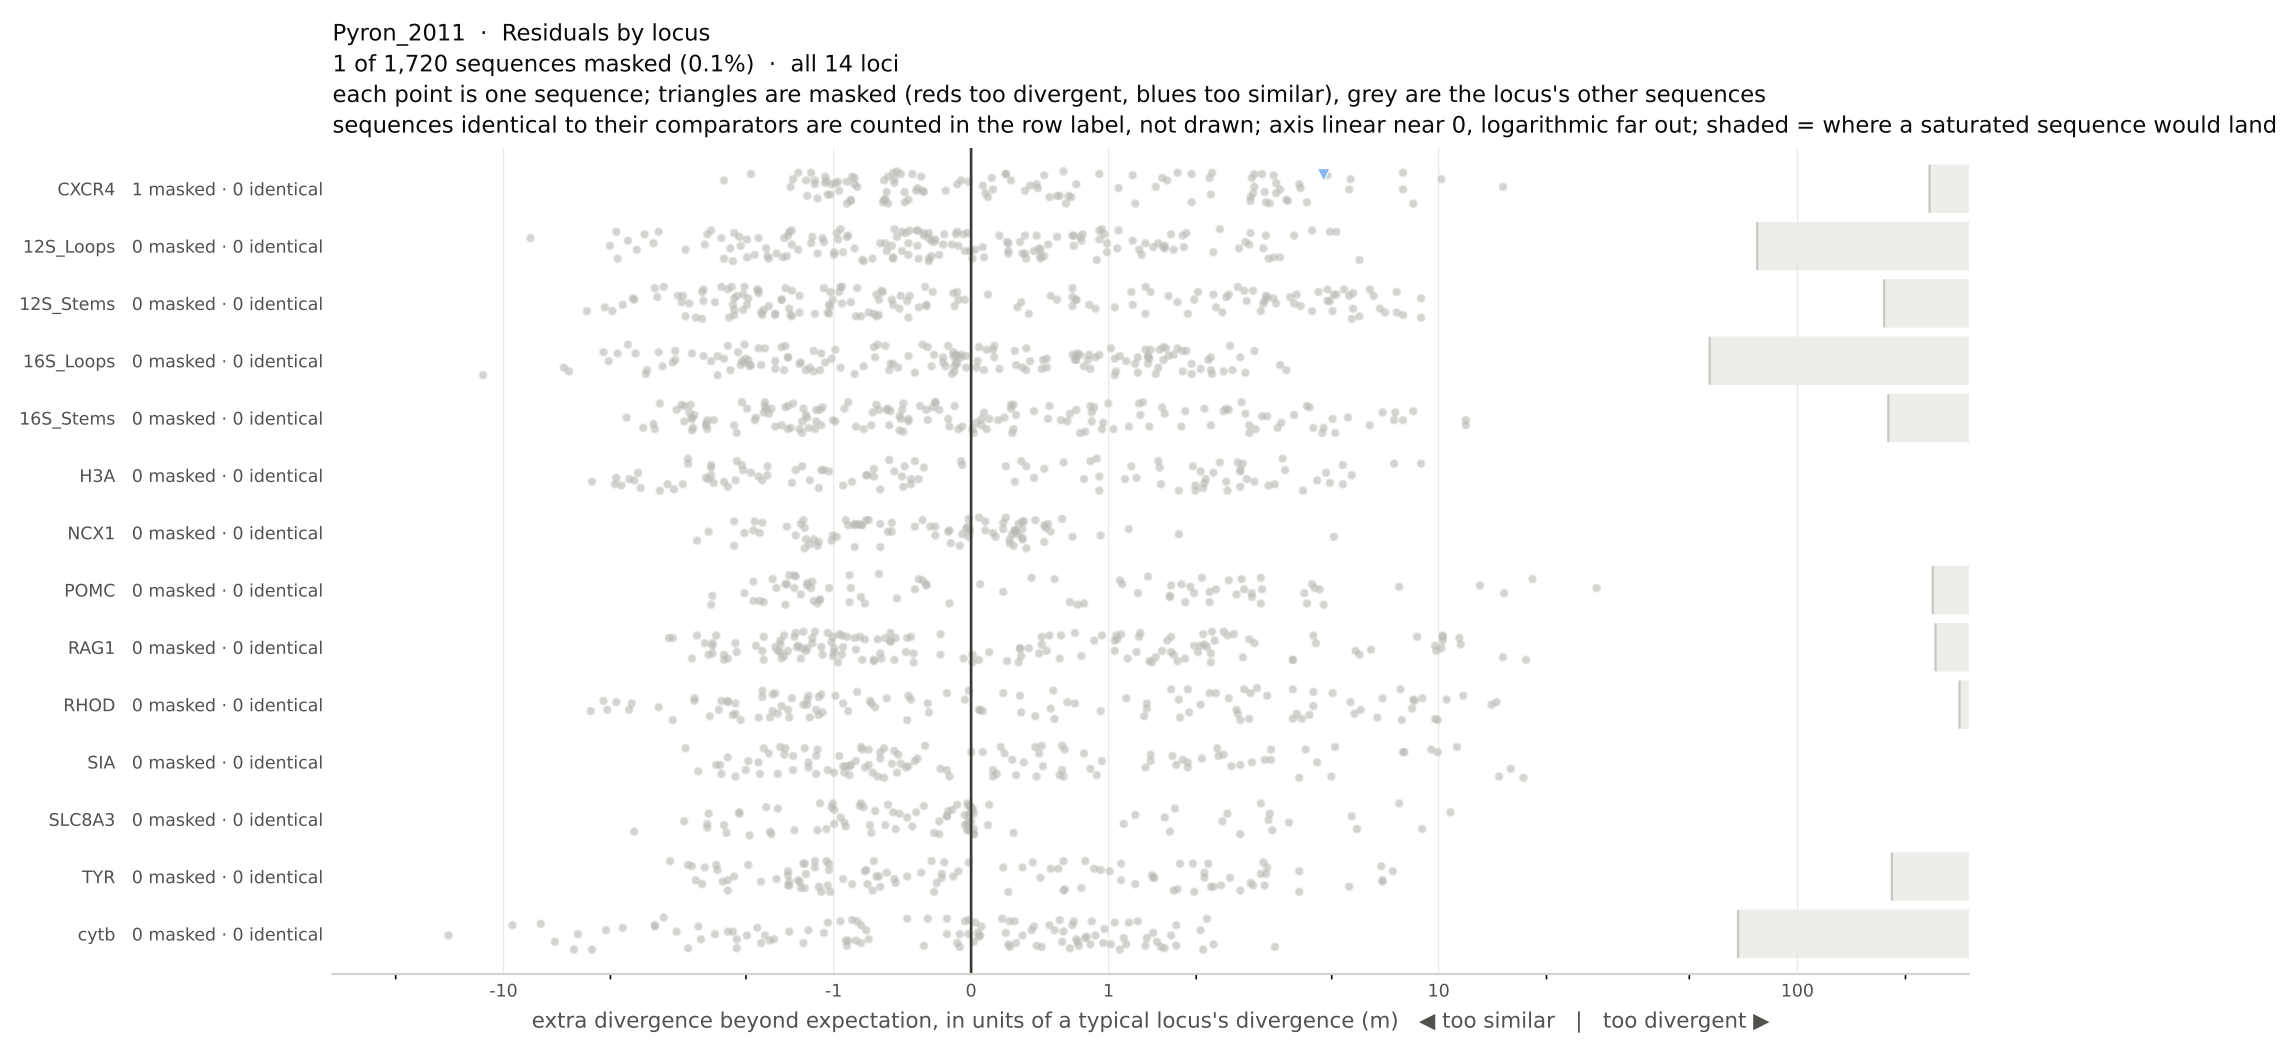

masked, too divergent · fails 3 of 5
masked, too divergent · fails 4 of 5
masked, too divergent · fails 5 of 5
masked, too similar · 1 pair
masked, too similar · 2 pairs
masked, too similar · 3+ pairs
count expected if the masked sequences matched like the unmasked ones

Pyron_2011 · Residuals by taxon
1 of 1,720 sequences masked (0.1%) · the 100 most masked of 160 taxa
each point is one sequence; triangles are masked (reds too divergent, blues too similar), grey are the taxon's other sequences
sequences identical to their comparators are counted in the row label, not drawn; axis linear near 0, logarithmic far out
